GLASSMAKERS

Brands in good hands!

onis

royal
leerdam

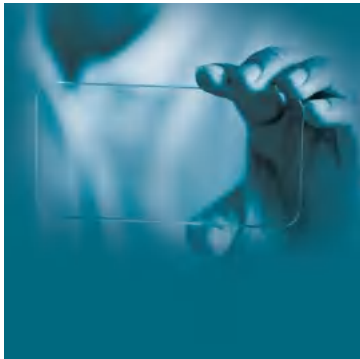

LC Glass has been designing, producing and selling glassware for the last 250 years under the brand Royal Leerdam for end-consumers, and is now introducing Onis, the new iconic brand for Professionals. Our vast experience in customizing glassware makes us a preferred global supplier for the drinks industry.

Our market approach and customer relations are based on the fundamental pillars of Business to Business: transparency, collaboration, adaptation, and customization. These four pillars are the foundation of a new communication strategy and serve as the base to this customization guide, which aims to inspire and support all our customers.

This guidebook compiles information about our identity and business philosophy, the relationship with our customers and partners, our service flexibility and ability to adapt to new challenges, and finally our creative solutions to develop added value products. Furthermore, you will also find a section with our glassware collection, that includes a vast range of versatile products, which can be branded according to the customers' needs.

Our expertise in developing branded glassware positions us as true experts in the glass industry. Passion drives our performance while craftsmanship perfects our results. Thus, with our team of passionate glassmakers, your brands are in good hands!

our identity

WHO WE ARE

LC Glass has been writing the history of Glass in Europe since the XVIII century. We are proud of our rich roots preserved throughout the ages in the European glass cities of Leerdam, The Netherlands and Marinha Grande, Portugal.

Leerdam glass factory
The Netherlands

Crisal glass factory
Portugal

In 2022, we have embraced a new chapter in our history by joining Anders Invest group. We continue to dedicate our day-to-day business to those who look for quality and originality, providing an excel service level to all our customers.

Leading global supplier for
the drinks industry (beer, wine, spirits,
cocktails, soft drinks, juice & water).

Over 200 Million glasses per year
Turnover: 120.000 000€ (approx.)

We are leaders in producing glasses that have become industry icons and are renowned worldwide. The secret to our success is high-quality products with brilliant design, an innovative strategic approach and the continuous investment in new technology, aiming to become the greenest glassware manufacturer in Europe.

WHERE WE ARE

■ Direct exports
■ Indirect exports

An European company with a global range!

With 2 production plants strategically located in western and central Europe, LC Glass offers a worldwide service of excellence, exporting to more than 100 countries, over the 5 continents.

our identity

WHAT WE MAKE

LC Glass manufactures automatic glassware produced in several techniques and offers an array of customization possibilities, according to the customers' needs.

From tumblers to stemware or mugs, our product portfolio offers a variety of pieces for different purposes and every occasion.

We supply high-quality products to the main players of the drinks industry worldwide, for a multitude of brands from different categories and market segments, but also for the food industry, airlines, and candle filling companies amongst other sectors.

HOW WE WORK

Trust and loyalty are essential for building successful businesses. Trust is a vital business component built through integrity, honesty, and respect, while transparency is the most robust way to maintain customers' loyalty.

LC Glass is deeply committed to comply with these strong values towards its partners and customers. By working closely together with our partners, we challenge our standards every day to solve problems and overcome the obstacles that emerge along the way, assuring the continuous success of our operations.

We count on a reliable team of diligent professionals that work hard every day to meet the most exigent demands of our customers. We set high-standards for the speed and quality of our service, to assure our customers' satisfaction and establish a solid base of long-term relationships.

The soul of business is no longer secret but is transparency instead!

Respect is earned, honesty is appreciated, trust is gained and loyalty is returned.
Oscar Auliq-Ice (Investor, Hedge fund manager, and Philanthropist).

WHAT WE CARE FOR

Sustainability becomes more and more important. It turned an increasingly crucial factor in all purchasing decisions. Therefore, LC Glass has been crafting a new sustainable agenda.

Recycling has always been at the heart of our business.

We aim to produce our 100% recyclable glass products with zero impact on the environment, assuring that the next generations are able to live in a better world.

We do this by applying sustainable processes throughout the organization and supporting social, economic, and cultural progress in the communities where we live and work.

By being a socially responsible corporate organization, we drive sustainability efforts together with our stakeholders and other companies to address the United Nations Sustainable Development Goals. We have established the four main pillars that will drive us to become an even more sustainable company.

In our continuous path to contribute for a greener future and a healthier planet, our main goals are to become carbon neutral by 2050 and eliminate fossil-based plastic in our operations by 2030.

We will continue contributing to a sustainable community, by embracing social initiatives and collaborating with sustainable organizations, in the coming years.

WHAT WE ARE PROUD OF

ENVIRONMENT

- Products 100% recyclable without loss of quality.
- Glass 100% food-safe and unarmful to the environment.
- Each new glass starts with 20% to 50% of pre-consumer recycled glass.
- Installing new furnaces to drastically reduce energy consumption and minimizing CO₂, Nitrogen Oxide and dust emissions to the atmosphere.
- Moving towards the use of renewable electric energy sources.
- Electric power used in our Dutch plant comes from green electricity.
- Implementing systems in our Portuguese plant to reduce the natural gas waste.
- Cooperating closely with national environmental and waste entities to promote recycling.
- Minimizing the use of paper via digitalization of all working processes.
- Packaging made of 80% to 95% recycled cardboard.
- Repurposing and combining existing molds to develop new products or create new life cycles.

SUSTAINABLE PARTNERSHIPS

- Cooperating with Rebottled to give old wine bottles a new life as sustainable glasses.
- Working with a Design University to train, challenge and encourage future designers to take part of the incredible glassware industry.

SOCIAL & COMMUNITY

- Awarded a silver medal of Eco-Vadis sustainable rating for labour, human rights and environment.
- Excel in social and ethical audits.
- Celebrating diversity, racial equality and social justice.
- Supporting a broad range of non-profitable organizations, embracing the responsibility for social progress.

The way to a greener future starts from within. Let's pave the way together!

your partner

Our company is the ideal partner for any business. We challenge our customers to collaborate with us when developing exclusive projects. By sharing our knowledge and allowing customers to act as decision-makers, we empower them and gain their trust and loyalty in return. We build long-term relations with our customers and create solid partnerships with experts and professionals. Partners in prime!

“If you want to go fast, go alone;
if you want to go far, go together.”

African saying

PASSIONATE GLASSMAKERS

your partner

COLLABORATIONS

Strong relations with drinks producers and professionals in the hospitality industry are key to understand the market's evolution and the consumer's behaviour. By closely collaborating with experts from different areas we get crucial insights from true masters, inspiring us when developing customers' specific projects.

Development of signature glassware for international drinks' brands.

We are proudly recognized by the main players in the drinks industry as a trusted partner for co-creations of exclusive glass designs for their international brands' portfolio. We encourage our customers to be involved throughout the entire process, granting them the ultimate branding experience.

Co-creation with beer experts for the perfect tasting glass

Collaborations with drinks' professionals, such as spirits connoisseurs and beer or wine sommeliers, turn into the successful development of signature glasses, designed for perfect serves.

Cooperation with bartenders to design iconic cocktail glasses.

Our excellent relations with bartenders, baristas, brand ambassadors & social-media influencers from the European cocktail scene, contribute to the creation of trendy shapes that match the market's demands. These professionals often feature in our marketing tools (website, themed leaflets, social-media channels, etc.), sharing market's insights and amazing cocktail creations to inspire their peers.

PARTNERSHIPS

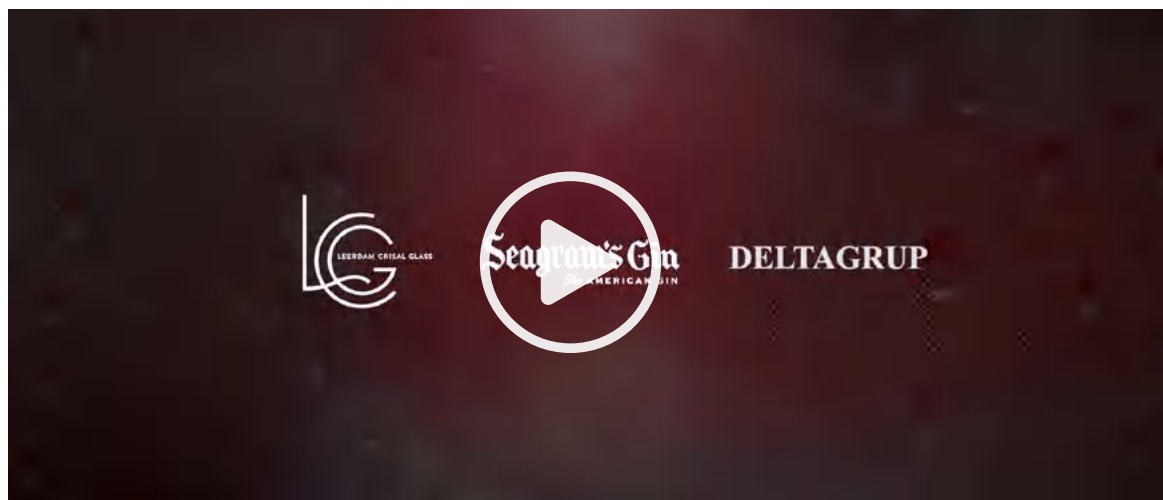

Jehan Fraval - Commercial Director (Deltagrup)

The long-lasting collaboration between LC Glass and Deltagrup has led us to overcome countless challenges together, allowing us to build a solid and reliable relationship.

People are an essential part of the success of this partnership. This important pillar of the business, that ultimately makes the difference in the operation, tends to disappear as companies grow. Fortunately, it is extremely present in our symbiotic relation, being crucial in the approach towards our customers.

As customers play a central role when developing new projects, we are constantly alert to their demands, which allow us to create solutions that fully meet their needs. The perfect articulation between the multidisciplinary teams from both companies is vital to accomplish great collaborations with our customers.

A great example of teamwork is expressed in the next video, introducing all the stages of development of signature glasses for an international spirits' brand, from concept to production.

Often, there are projects that challenge our technical capabilities, but working closely together, we have been able to surpass those limitations and obtain great achievements, opening new market opportunities. This was the case of the Copacabana glass, which responded to the demand from major spirits brands for large-capacity stemware to serve mixed drinks. This type of glass, which was born from the needs of the Iberian market, is now expanding to many other parts of the world.

AnDer - the best glass for brewers and beer lovers!

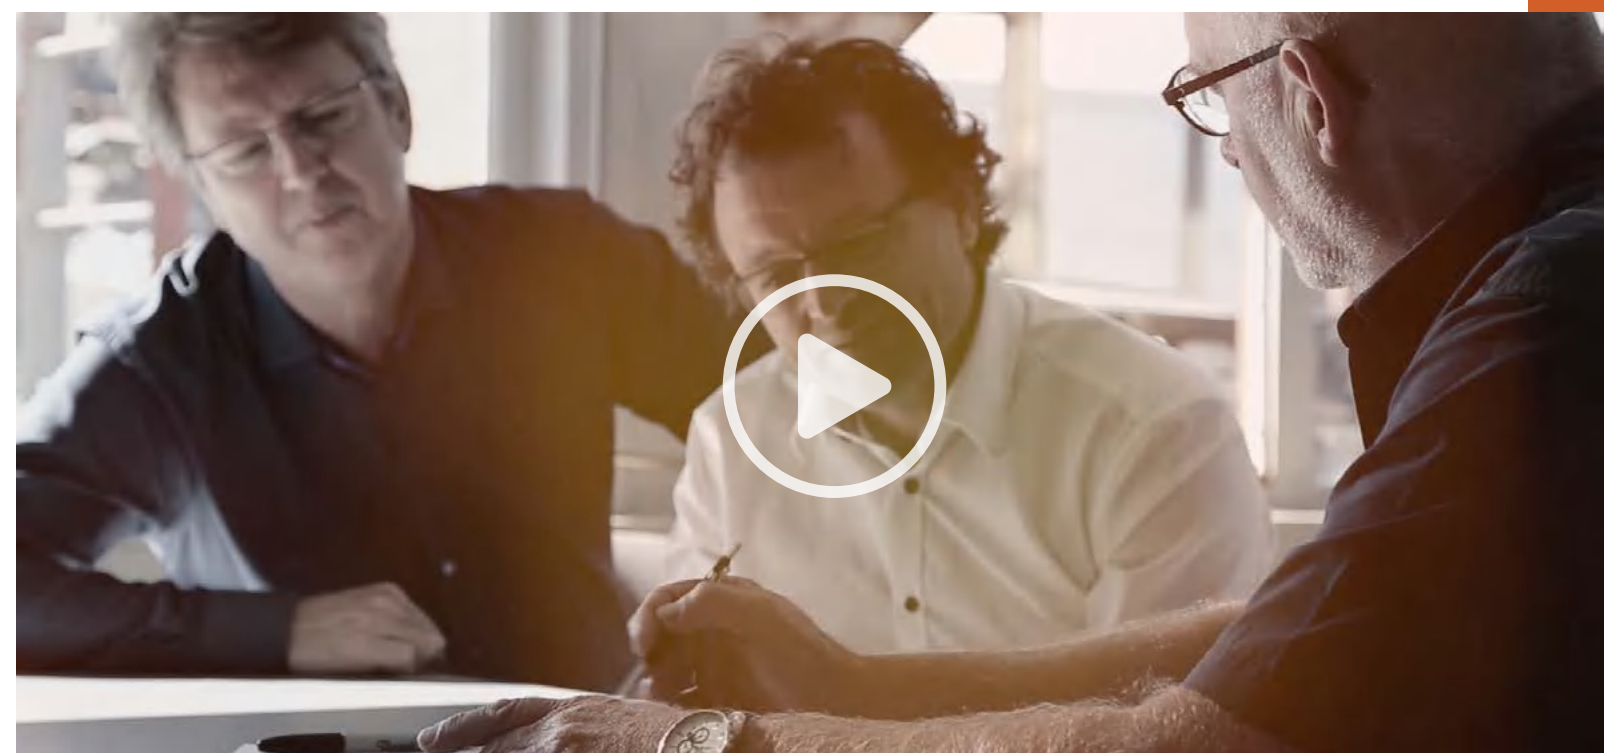

AnDer is a co-creation between Royal Leerdam and Dutch beer experts to develop the ideal glass to smell, taste, evaluate and drink beer.

Carefully designed by our former glass designer, Alfred De Groot, under the precious guidelines from Andre Koppen (beer sommelier) and Derek Walsh (beer consultant), AnDer beer taster matches the most exigent requirements of beer professionals.

AnDer's beautiful design goes hand-in-hand with its functionality. The wide tulip-shaped bowl, with a narrow top, makes it ideal to optimally judge the flavour, aroma, colour, clarity and foam concentration of different beer styles.

The huge success of this collaboration has encouraged us to develop two additional shapes, perfect for savouring craft beers. This bigger capacity is available in its original short stem and also in a tall stem version for a more dramatic statement.

GLASSOLOGY

by **onis**

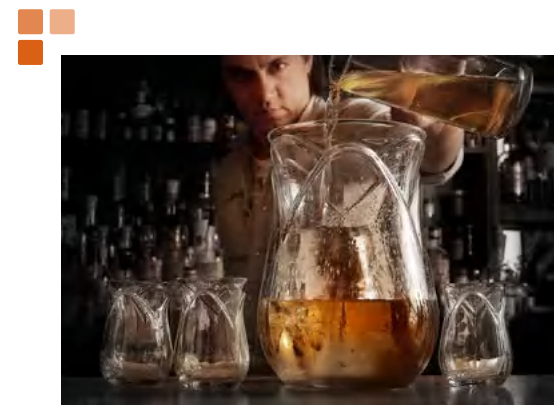

GLASS DESIGN CONTEST

www.glassologybyonis.com

#glassology

The Glassology Contest challenges professionals from the Drinks Industry to develop an original glassware design that offers the ultimate drinking experience for high-level guests. They are given the opportunity to come-up with a glass shape that elevates a reinvented cocktail or their newest boozy creation.

The winner earns global recognition, as his design is taken into production to be sold by Onis, all over the world. The cooperation with us continues after the contest, as the winner is named Glassology ambassador in bar shows and cocktail events and will be part of the jury of the next edition.

our service

We aim to provide our customers with a unique branding experience, from concept to delivery.

Using our craftsmanship expertise, we challenge our standards every day to create the best response to our customers' requests. Our talented international team is committed to find the best solutions and guarantee an excellent service to match the most exigent requirements. Being flexible and able to adapt to the specific needs of each customer, we skilfully meet their expectations. Happy customer, prosperous business!

“It is not the strongest nor the most intelligent species that survives, but the most adaptable to change.”

Charles Darwin (scientist and author)

PASSIONATE GLASSMAKERS

Brands in good hands!

expertise

Each customer is unique; its needs are different and constantly changing.

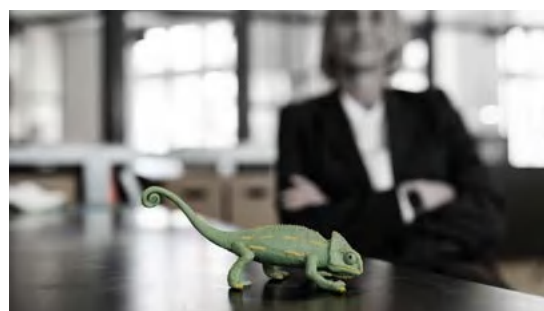

We rely on our skilled multi-faceted team of technical experts in different areas, who easily adapt to the specific demands of each customer.

Our partners can trust on our accuracy and precision to deliver qualitative products and provide a service of excellence.

We are strongly committed to make our customers happy and loyal to our business.

Adaptability and flexibility: our most competitive advantages.

Nowadays, with the changing dynamics of the global market, adaptability is essential for the survival of any company. Just like living organisms that must adapt to its natural environment, companies must be able to adjust to the constant evolution of consumption habits, market conditions and customers' demands, in order to be successful.

Corporate adaptation is key to remain competitive and stay relevant in any business area. With a strong customer focus, LC Glass is always on the lookout to improve its service level and the support offered to its customers. By being flexible, agile and adaptable, we strive to successfully meet the most exigent expectations. We rely on a skilful team of experts that constantly push themselves to provide the best solution to every single project, from concept to delivery.

And this is not just our opinion; our customers also recognize our ability to easily adapt to any situation, challenging our standards and overcoming every obstacle that comes along the way.

flexible service

A key driver of business success, customer service can make or break a company's reputation. You may have fantastic products, but if your customer service is unhelpful, unreliable, or just hard to get in touch with, you'll lose customers over it.

In today's business climate, flexibility simply can't be overstated. A good customer service must be flexible and adaptable to accommodate the constantly changing market's demands. By offering a custom-made service to our customers, we can get competitive advantages over other glassware producers.

STORY OF A PRODUCT DEVELOPMENT

skillful team

Life is a continuous learning experience; thus, our expertise is a consequence of years of practice in improving techniques and perfecting its results.

The source of our expertise is a long-term experienced team of talented professionals in diverse areas, that work closely together to achieve the best results, turning us into expert glassmakers.

Our skills and knowledge drive our performance, and position us as true specialists in our operations. We don't limit ourselves but, instead, we explore new ground, adapting to the customers' needs and the market's demands.

Exclusive customers' projects cross different stages of development and involve most areas of the company, some more deeply than others, but none more important than the next.

From sales to marketing & design, from molds and procurement to production and quality, or from planning & logistics to customer service, every area is deeply committed to comply with the requirements of the company and match the customers' needs. Teamwork is an essential requirement to reach success in every single project. Therefore, we rely on a dynamic team with diverse background expertise that, by combining personal skills, creates crucial synergies to achieve even greater results.

Nuno Tonico
Quality & EHS Manager

"The high level of exigence of the market constantly challenges us to invest in continuous improvement, with a strong focus on innovation, competitiveness and sustainability. By implementing Quality monitoring systems, we've been able to better control our processes, improve our service level, and guarantee a consistent quality of our products. This strategic approach is aligned with our customers' demands and drives us to comply with legal requirements, according to the ISO 9001:2015."

Carlos Espinha
Mold Design Manager

"In the competitive world of customization, adaptation is key to meet the most exigent customers' demands. We are in a constant pursuit for innovative technologies and exploring new ways to diversify our technical capabilities, to come-up with clever solutions to each and every challenge. Working in close collaboration with our customers and taking their feedback into account, is what makes us stand-out from the crowd. Together we can accomplish great results!"

Durval Gaspar
Production Manager

"We are constantly facing new challenges to match the continuous evolution of the market. We must be flexible to match the customers' demands and still be aligned with the requirements of mass production. We rely on the know-how of a solid and experienced team of expert glassmakers, operating 24/7 to produce glasses with quality, 365 days a year. Our diverse production techniques allow us to have a vast and versatile glassware assortment, for all market segments."

PASSIONATE GLASSMAKERS

Brands in good hands!

on-trend

Market trends tend to be heavily influenced by consumer habits and behaviours, which in turn are impacted, more than ever, by the fast-paced digitalization and evolution of information technology. Our international Marketing & Design team is always on top of the latest trends, which often serve as a launching pad to the product development strategy.

Rather than following the crowd, LC Glass strives to innovate and break new ground. By being alert to emerging trends, we create unique concepts and original products, that enable us to stand out from competition.

In this setting, social media is a powerful tool to keep track of industry influencers, their thoughts and reviews, which can be an important input for our portfolio, ensuring that it stays relevant for consumers.

ON-TREND

MARKET TRENDS

Nowadays, society is evolving, and the world keeps revolving. Like in the lyrics of a famous song*, it seems the next big thing is here, but in fact that's just history repeating. Despite what most people think, we are not living unprecedented times; society has experienced similar situations in the past. Like the Renaissance Period emerged from the Bubonic Plague, and the Roaring Twenties from the Spanish Flu, we are now emerging from a new crisis for "The New Roaring 20s".

The next couple of years will represent a unique window of opportunity to develop new products and create new ways to approach the market. Consumer trends are a decisive resource and a big advantage for brands to evaluate if they have the right portfolio for the market's needs. We have identified 3 major market trends that are influencing innovation and product development in the drinks industry, driven by 4 categories of food & drink personas.

Collective Visionaries – determined activists that support sustainable food and drink brands, through the power of community and networking.

Rooted Transcendents – conscious consumers with a holistic approach to personal wellbeing and planetary wellness.

Everyday Optimizers – smart multitaskers, with an eye on budget. They search for convenience, comfort and versatility, without neglecting health, taste and flavour.

Sensory Seekers – passionate discoverers that reject the status quo. They seek for the newest within the newest within the new, craving for technological and high-sensorial experiences.

* "History Repeating" by Miss Shirley Bassey
(composed by Alex Gifford)

CONVENIENCE, COMFORT & FUNCTIONALITY

Social habits are unlikely to completely revert to pre-pandemic levels, as most consumers seek for safety, comfort, and convenience.

The convenience trend is not a short-term phenomenon – it is here to stay! Comfort and functionality habits are two of the strongest trends witnessed by the food and beverage industry.

The increasing home consumption poses new challenges for Foodservice and require a new approach to original products and innovative on-trade concepts.

In this convenience scenario, the ready-to-drink category continues its meteoric rise. Mainly pushed by hard-seltzers, RTDs are growing more than spirits, wine or beer, and are on track to become the world's most dominant alcohol category. Led by the movement towards RTDs and takeaway cocktails, venues are also incorporating them in cocktails.

Coffee is not just coffee anymore! It's a discovery of new flavours and original mixes, leading to revised rituals and taste preferences in a perfect match to trendy lifestyles. Seductive and stylish, yet technical, the science of coffee injects a new dimension on how it is served in cafés, at home or even at the office.

These days, lack of storage space is a harsh reality both in bars and restaurants, but also at home. To solve this recurrent issue, our glassware collection includes a variety of pressed tumbler ranges specially designed for stacking purposes. Space-saving stackable glassware not only assures a longer service life, but also reduces replacement costs.

HEALTH, WELLNESS & SUSTAINABILITY

Sustainability isn't just about the sake of the planet; it's also about the welfare of people. From the air we breathe to the food and drink we consume, the environment impacts human health.

Consumers are becoming more environmentally conscious and feel a deep need to reconnect with nature. This group seeks to consume foods with benefits that provide them a more holistic approach to life.

Well-being is on top of mind, as consumers intend to keep spending more on products that improve their healthiness and mindfulness.

In this landscape, alcohol producers are evermore committed to contribute for a better world and simultaneously to the wellness of its consumers, by developing no-low alcoholic products that comply with this growing necessity. From their side, consumers support meaningful brands and business practices that actively improve the world.

In the drinks industry, there is an increasing demand for single-origin products, to which brands respond by launching inspired varieties and special editions. Spirits with provenance, made from organic and bio ingredients (such as tequila & rum), or created under artisanal production methods (like mezcal & bourbon), are definitely on the rise. Bartenders crave authentic brands with storytelling, which they can relate to and share with their customers.

Conscious bartending encourages the use of fresher ingredients, support local producers, improving its profits and keeping their guests happy. Sustainable cocktails minimize natural resources and conserve energy, even if it is one lime at a time. It is about throwing away less "leftovers" and using the full potential of each ingredient, embracing a zero waste policy

PREMIUMIZATION, EXPERIMENTATION & INNOVATION

Already an alcohol trend prior to the pandemic, premiumization has accelerated during lockdowns, obviously pushed by at-home consumption. Consumers, especially Millennials, are now willing to pay more money for premium segments of alcohol, such as cognac, whisky, or rum.

This trend is here to stay and will evolve over the next few years, as consumers seek quality over quantity. Premiumization will slow down in off-trade retailers, but it's expected to grow dramatically in the on-trade, as consumers are going back to bars and bartenders are incorporating them in cocktails, to elevate the drinking experience.

Rum is growing twice as fast as the spirits category*, mainly pushed by premiumization. Craft Rum is taking the lead, as consumers discover high-quality varieties, while spiced/flavoured rum is recruiting a new generation of drinkers. In a more sustainable approach to the market, Rum producers focus on origin and provenance by using locally grown ingredients and ancient production methods to create organic/artisanal editions.

*According to several market reports

PREMIUM SPIRITS

Alongside maturity comes sophistication!

Mature segments, such as whisky or cognac are exploring the brave new world of premiumization, while less developed categories like tequila and mezcal invest in experimentation and focus on provenance.

Reinvention is key to conquer new consumers.

Category lines are blurring, originating hybrid spirits, both intra-category (fusions between scotch and bourbon or tequila and mezcal) and cross-category (rum aged in bourbon casks, whisky finished in cognac barrels).

Consumers want to expand their world by discovering new blends, new flavours and tastes to thrill their senses. Brands are responding to consumers demands by launching innovative varieties to attract younger drinkers (millennials and Generation Z).

Experimental spirits will emerge, giving rise to endless possibilities for new cocktails and combinations, with intriguing ingredients and mission-driven stories behind them. The emergence of premium spirits has seen consumers spend more money on high-end alcohol brands in the off-trade.

As a consequence, status spirits have grown more than the total spirits market and is expected to accelerate in categories such as Rum, Tequila or American Whisky. Premium-and-above spirits will grow their global volume market share over the next few years, as consumers seek quality over quantity.

CRAFT BEER

While conventional beer consumption is slowly declining worldwide, craft beer is shaking up this pioneer industry, by adopting future trends earlier than any other. Betting on premiumization, innovative varieties, new styles, and original flavours make the difference.

The craft beer boom is pushed by an increasing demand for high-quality beverages with a sustainable footprint.

Brands are creating an exclusive universe of customized items worshiped by beer lovers, especially the younger generations who are eager to be part of this trendy and cool subcultural movement.

Craft brewers are definitely paying more attention to glassware for branding purposes!

HAZY IPAs (NEIPAs)

These unfiltered beers look hazily opaque and are available in an array of nuanced flavours, balancing bitterness with a soft mouthfeel to match to consumers' desire for easy drinking, less bitter, more tropical and juicy flavoured beers.

SOUR & WILD BEERS

Quickly becoming a favourite style amongst modern beer lovers, thanks to unique refreshing flavours and food pairing versatility. Their flavour complexity is appealing for wine and cocktail drinkers, who like the sweet acidity and tartness.

DESSERT STOUTS

Brewers are creating dessert stouts with lactose and ingredients like vanilla, coffee, or cinnamon. Made to be indulgent, these pastry stouts have higher ABVs. and sweet flavours are perfect

your brand

At LC Glass, we take good care of our customers' brands. With a strong customer focus, our DesignLab creates original solutions to help any brand stay relevant and stand-out from the competition.

We rely on an array of techniques to develop exclusive and unique glasses, which become essential promotional tools, to communicate the brand's identity to the consumer.

Your brands are in good hands!

“Design is the silent ambassador of your brand.”

Paul Rand
(graphic designer)

PASSIONATE GLASSMAKERS

Brands in good hands!

glass design

LC GLass is particularly strong in creating customized glassware for branding purposes.

Our production capabilities allow us to develop signature glasses to promote a brand's identity and generate more brand awareness.

Our expertise is the perfect tool to create exclusive shapes, according to the customer's needs. This is the best way to stand out in the market and differentiate from competition.

glass lab

Our Glass Lab offers the possibility to create original exclusive designs, through a multitude of customization techniques. Customers can count on our experienced marketing and design team to come-up with original solutions, that turn into clear branding statements.

We can create a totally new design, make a new combination between bowl and stem, or customize an existing shape by switching part of the mold (bottom, footplate, or plunger).

Custom-made glass design is an important marketing tool to many brands, especially in the drinks industry.

PRODUCTION CAPABILITIES

Our production techniques allow us to develop exclusive bespoke glasses for drinks' brands and other market segments. Features like embossing, feeder-colour or stackability, are added values when it comes to customizing existing shapes.

LC Glass currently owns three different production processes, that are ideal for customization purposes. The blown process includes pressed-blown and fix-blown, while pressed has three options (block-mold, split-mold and tulip-mold), and two-piece stemware that combines both processes (blown bowl & pressed stem).

SIDEWALL EMBOSSING

Embossing is the most common way to customize glassware. Brands often create signature glasses by reproducing its logos embossed in the sidewalls of a glass. Available in fixed-blown and pressed techniques, it can be applied in a wide range of items, from tumblers to stemware, mugs or any other shape.

* Fixed-blown embossing

* Pressed embossing

BOTTOM EMBOSSING

Pressed tumblers or mugs can be customized with a lower investment. By switching only part of the mold (bottom) we can turn a standard shape into an exclusive branded item. Fix-blown items and two-piece stemware can also be branded on the base.

* This is an exclusive item that cannot be used or reproduced for other customers. The picture is being used only as an example of this capability.

FOOTPLATE EMBOSSING

Stemmed glasses can be customized without losing its elegance. A subtle branding embossed on the base of the footplate it is an affordable solution to create a signature stemware.

STEM EMBOSSING

Stems can also reflect a brand's identity. Despite not frequently used, this technique allows to emboss small details, like icons or symbols representing a brand. This feature permits to create original designs, by juxtaposing a simple bowl shape with an elaborated stem, that can reproduce detailed elements and patterns, or be sculpted by facets, angles and curves.

PLUNGER EMBOSSING

It is possible to customize the inner side of pressed glasses to develop original products. An inexpensive way to upscale standard items into sophisticated look and feel products, matching the latest market trends.

1 MOULD + 5 PLUNGERS = 5 PRODUCTS

* This is an exclusive item that cannot be used or reproduced for other customers. The picture is being used only as an example of this capability.

STACKABILITY

Glassware with stackable design is a plus for some customers and/or markets. This feature is an exclusive of pressed items, ensuring optimal functionality allied to space-saving maximization. Only glasses that are designed for this purpose should be stacked.

STACKING AREA
ON PLUNGER

COLOURED GLASS

Feeder colour can become an added value to standard shapes. Pressed items can be fully coloured but on blown stemware only the stem and footplate can be tinted. Blown pieces, however, are only possible to customize with an organic and randomly positioned colour stripe (limited colours available).

PASSIONATE GLASSMAKERS

Brands in good hands!

decoration

Customized glasses are great merchandising tools for the drinking industry. Our customization techniques are the ideal resource to transform a simple glass into a powerful branding instrument.

Brands can reproduce their identity by printing their logo in the glass, or get more creative and develop original decorations for limited collectors' editions.

Home Décor retailers frequently create exclusive decorations, reproducing original patterns that match the latest lifestyle consumer trends.

deco lab

Our Deco Lab offers an array of decoration possibilities for glassware customization. We count on a multi-functional and experienced team of marketers, designers, and technicians to provide the best solutions to our customers' needs.

Decorated glasses are powerful merchandising tools that can simply reproduce a logo or, instead, display original decorations. Brands often develop collections with different designs for promotional campaigns.

Retailers frequently use decorated glassware to match other homeware items from its seasonal private label collections. From trendy patterns and motifs to elaborated ornaments, from figures and cartoons to stylish colour combinations, there are no limits to imagination.

DECORATION TECHNIQUES

Our customization options include a multitude of decoration techniques in-house for different purposes. While silk screening is ideal for big productions, decals are most suitable for smaller quantities. Tampon printing is perfect for difficult areas, sandblasting imitates a frosting effect and laser is the solution for subtle decorations. Crafted paintbrush is unique, and our endless spraying options can be combined with any other technique to create amazing masterpieces.

SILK SCREEN (DIRECT PRINT)

Considered by the drinks industry as a fundamental branding tool, this technique is chosen by most drink producers to create more brand awareness.

Other areas such as food industry, personal care, and household product manufacturers, also use branded glassware as a merchandising vehicle, while candle filling companies create original products with trendy decorations.

From 5.000 pieces in one colour, or 20.000 in multiple colours, silk screening is perfect for big quantity orders. We can print a maximum of eight colours in inorganic inks (cadmium & lead-free inks available), while in organic inks the limit is five colours (wider pallet of tones and shades). Precious metals are also available for a premium look and feel.

LASER

A low-cost technique, perfect for subtle decorations. It is commonly used in beer glasses to mark gauge lines and nucleation points (can be made in-line with production).

Market: beer
gauge line

SPECIAL SILK SCREEN (DIRECT PRINT)

Special effects are available for an added value. While decorations in phosphorescent inks have a glow in the dark effect, high-relief silk screen simulates the embossing on the glass, for a tactile effect.

IT'S NOT EMBOSSEMENT
It's high-relief silk screening.

Embossing simulation
(transparent or colours)

GLOW IN THE DARK
At night your brand comes alive!

Phosphorescent effect
(perfect for nightspots)

TAMPON PRINT (PAD PRINT)

This technique is used in areas that are difficult or impossible to decorate in silk screen (curvy or concave areas and near the stem or handles). Commonly used by wine producers which require a subtle and elegant branding it's frequently applied on the footplate of stemmed glasses.

Market: wine
footplate deco

SAND-BLASTING (FROSTING)

This technique permits to give a frosting effect to any glass. Commonly used by beer brands to transmit an ice-cold look and feel to the drink, it can be combined with silk screen for extra brand awareness.

Market: retail
deco with mask

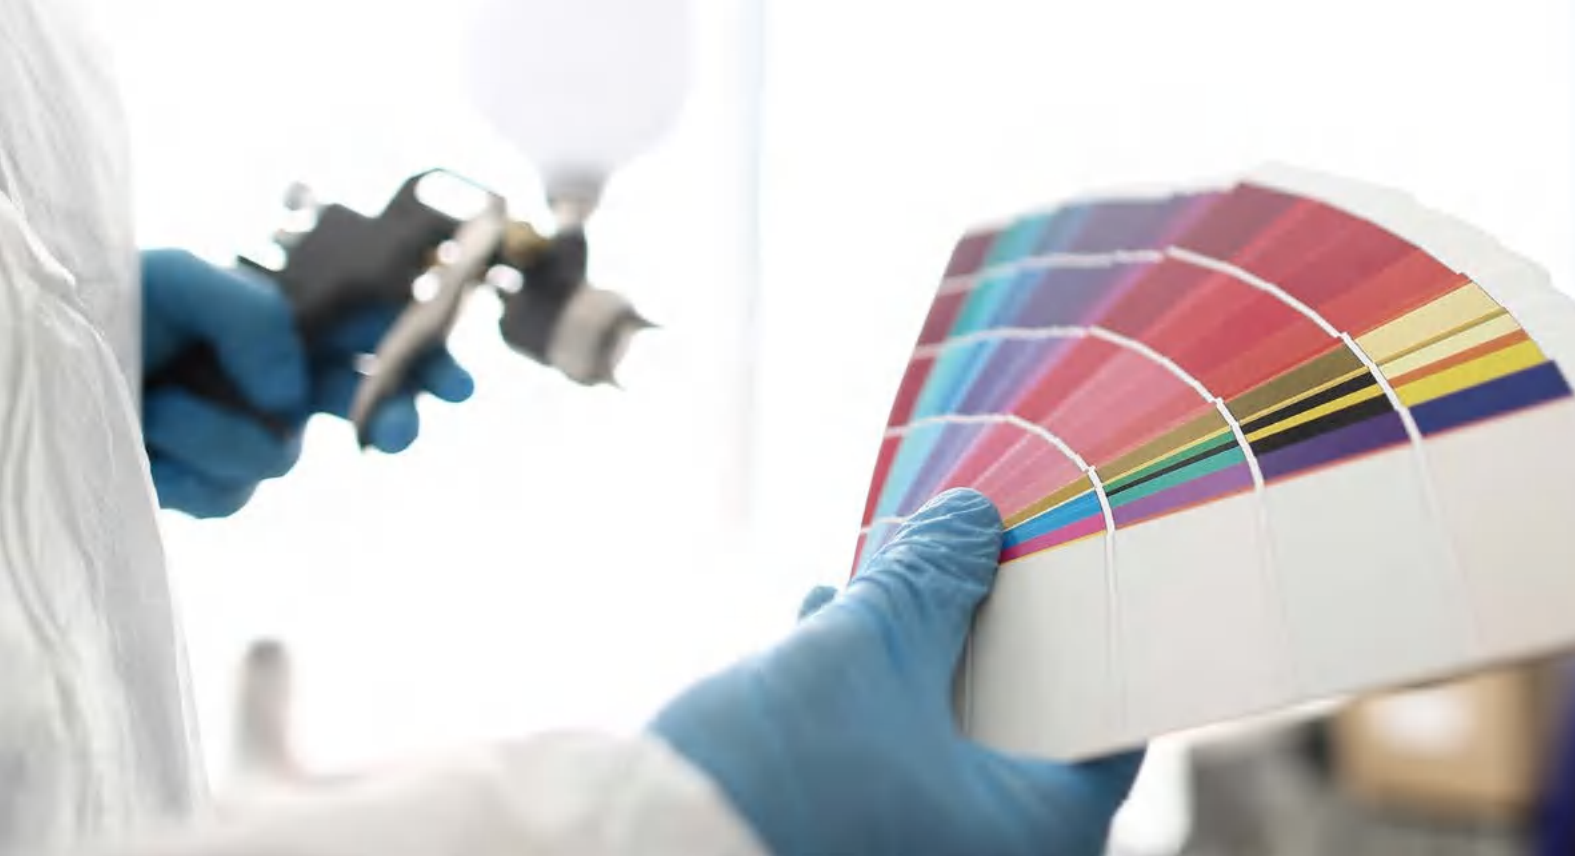

DECAL (TRANSFER)

Decals are the ideal solution for decorations with more than 8 colours and small order quantities. It is also an alternative for areas where silk screen is not an option (manual application).

Market: non-drinks

SPRAY (COATING)

A multitude of colours is available to transform basic shapes into trendy products. It is possible to spray an item fully or partially, choosing from an array of coating finishes and special effects, to obtain an elegant look and feel.

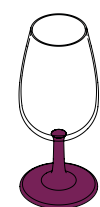

We use mostly food-safe inks (water-based), except for the mirror and lustre effects, that are only applied to products for home-décor purposes.

COATING OPTIONS

Areas of the glass that can be coated:

1. Bowl

2. Stem & foot

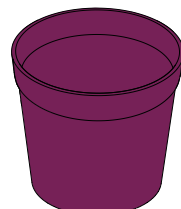

3. Footplate (base)

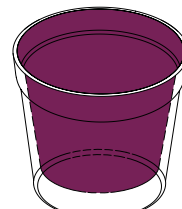

4. Ring and Handle

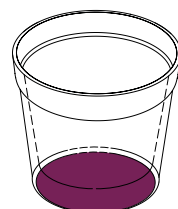

5. Outside - 2 colours (full wrap)

6. Outside (full wrap)

7. Inside (full wrap)

8. Bottom

9. Partial (degradé)

COATING FINISHES

Transparent

Opaque glossy

Opaque matt

Neon (frosted look)

Frosted (translucent)

Pastel (milky aspect)

Metallized (opaque)

SPRINKLE EFFECT

A different way of applying a spray creating original pieces. Each item is unique (manual application).

DEGRADÉ EFFECT

An original look and feel obtained with a gradient colour transition. Possible to combine more than one colour in the same item, it is available in different coating finishes.

LUSTRE EFFECT

(iridescent colours)
For Home-Décor purposes only (not food-safe).

MIRROR EFFECT

(inside spraying)
For Home-Décor purposes only (not food-safe).

SPLASH EFFECT

Dynamic and creative effect, applied on any type of product. Each item is unique (manual application).

CLAY IMITATION

Material combinations is a new trend that can be achieved with this innovative textured spray.

PAINTBRUSH

Each item is unique (manual application).

Gold rim

PASSIONATE GLASSMAKERS

Brands in good hands!

packaging

Packaging is more than the enclosing of an item. It's an important branding tool, playing a key role in communicating the image and identity of a product or a brand. An attractive packaging can help a product stand out on the shelves and boost its sales. From standard boxes to special packaging, the limit is imagination.

packaging lab

There are several options when it comes to develop the right packaging to a glass. Whether the box is going to be used only for transportation or for branding/retail purposes, each option has its pros and cons.

Our packaging lab offers an array of box construction options and customization possibilities. We count on an experienced team of designers and packaging engineers to provide the best solutions to our customers' needs.

Packaging design is more than the simple development of a means to protect the contents of a package. It is a sales canvas, on which to promote the product's attributes and benefits, but also a powerful marketing tool that can become, in some cases, part of the product experience itself.

PACKAGING MATERIALS

Corrugated cardboard it's the proper packaging material for packing, storage and shipping glassware. It's a cheaper and sustainable material made from recycled resources, effectively protecting fragile items, and it is easily printable, therefore, ideal for branding and logistical customization. Available in single or double flute it is suitable for boxes and packaging, as the smooth exterior surfaces ensure that it's easily stacked for efficient storage and transportation. Double flute is ideal for heavier items for its strength, which permits larger stacking in warehouses and shipping containers.

PRINTING TECHNIQUES

■ ■ ■ OFFSET

Offset printing is the most commonly used printing technique for paper surfaces. It has the highest printing quality, with remarkable definition in reproducing pictures, allowing a wide variety of finishes, and prints until 6 colours, plus finishes.

■ ■ ■ FLEXO

Flexography is a printing that can be used for printing almost any type of substrate, including paper, plastic or metal. Flexo has generally low printing quality, with limited colours, no finishes and it's unable to reproduce complicated intricate artworks with very detailed images.

■ ■ ■ HD FLEXO

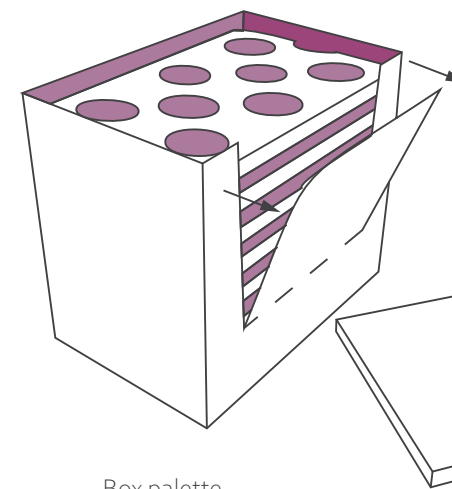

A new generation of digital flexo with more printing definition, reproducing high-resolution imaging through high-definition optics. It prints sharper images, text, and other lines, with bigger consistency and higher efficiency, reproducing better dots and delivering better colours with more natural whites and grey levels. It can also create textured surfaces. When compared to offset, it only becomes a cost advantage for big quantities.

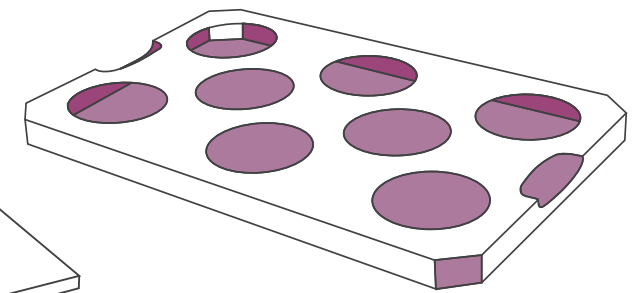

STANDARD PACKAGING

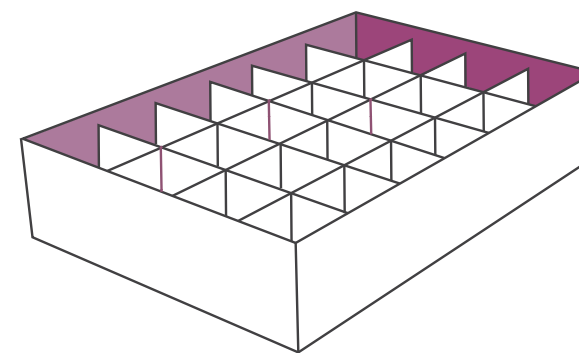

Although simple and plain, bulk packaging offers an unlimited number of options. It can also be personalized by printing. From standard boxes, trays or box palette to open sleeves, individual or display boxes, it's easy to find the best solution adapted to the needs of each customer.

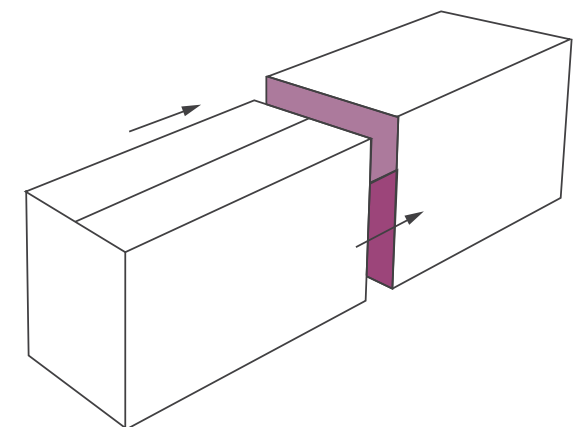

Box palette
(cover and detachable front optional)

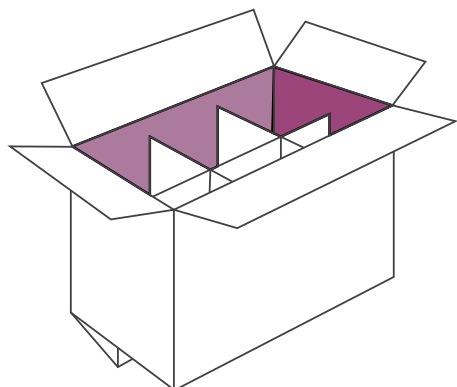

Standard tray

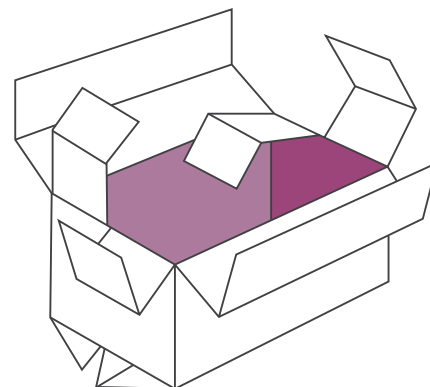

Tray with dividers

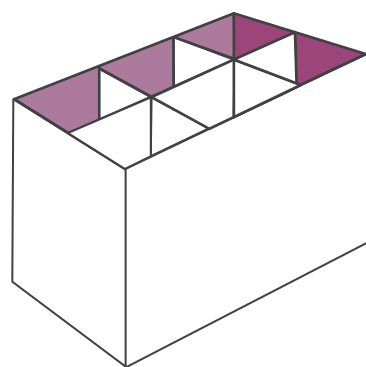

Standard box with sleeve

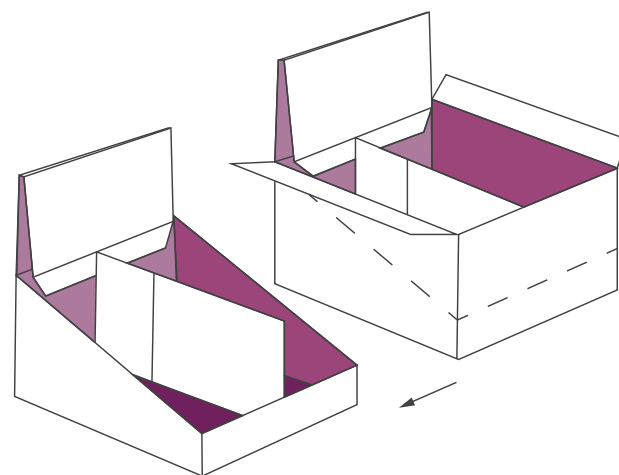

Standard box with dividers
(American style)

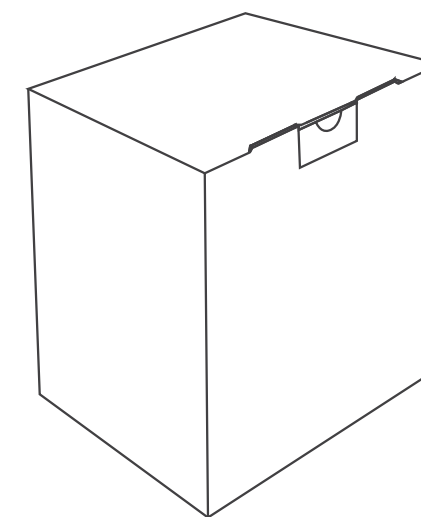

Standard box with flaps

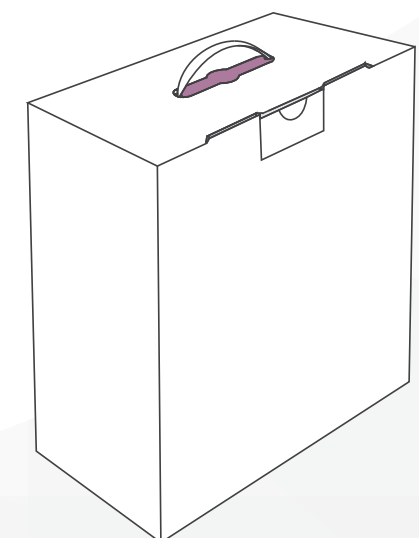

Open tray with auto bottom
and dividers

Display box
(with or without dividers)

Auto-lock standard box

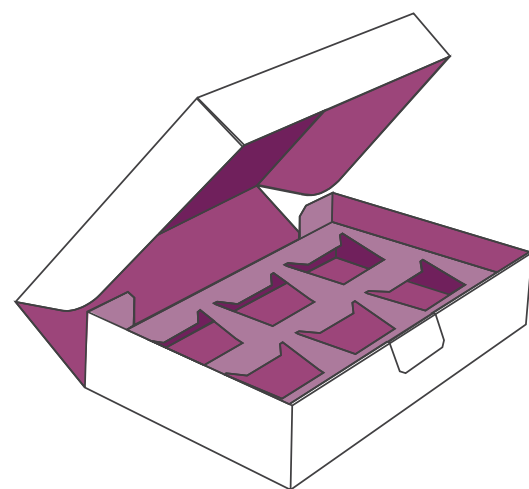

Auto-lock box with plastic handle

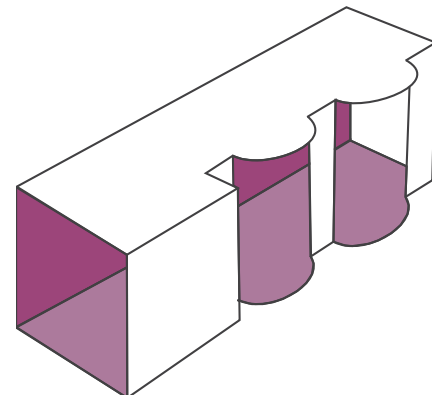

SPECIAL PACKAGING

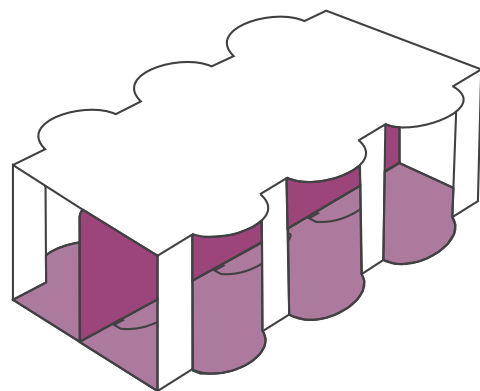

It's possible to develop special packaging based on functionality or originality. A unique box design with an elegant layout can make a product capture the attention of the most exigent buyer. Usually printed with eye-catching imagery, special packaging can be the perfect vehicle to promote a brand or making a product stand out from competition.

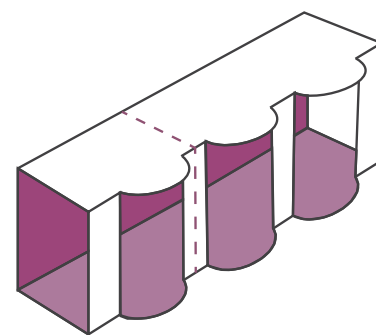

Gift case with horizontal divider

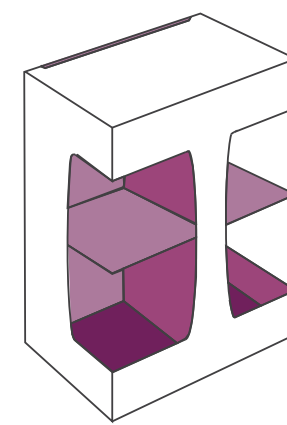

Open sleeve with front panel

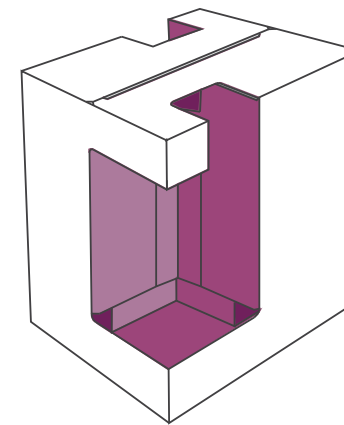

Open sleeve (pack of 6)

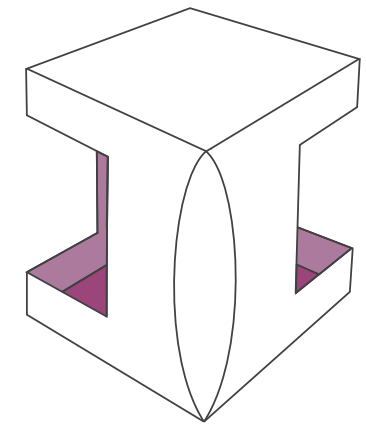

Open sleeve
(possible to separate per unit)

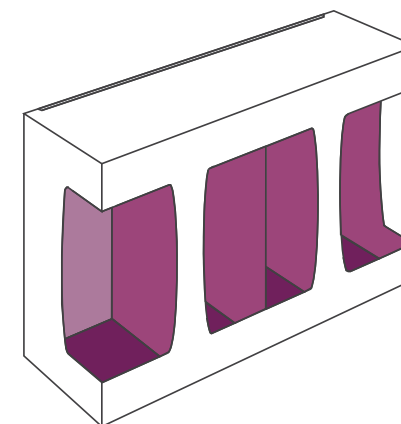

Box with corner windows

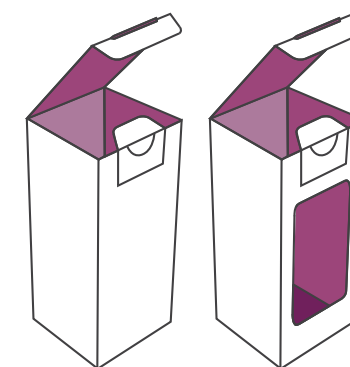

Box with corners onto lid,
auto bottom and dividers

Auto-lock standard box

Box with front and corner windows

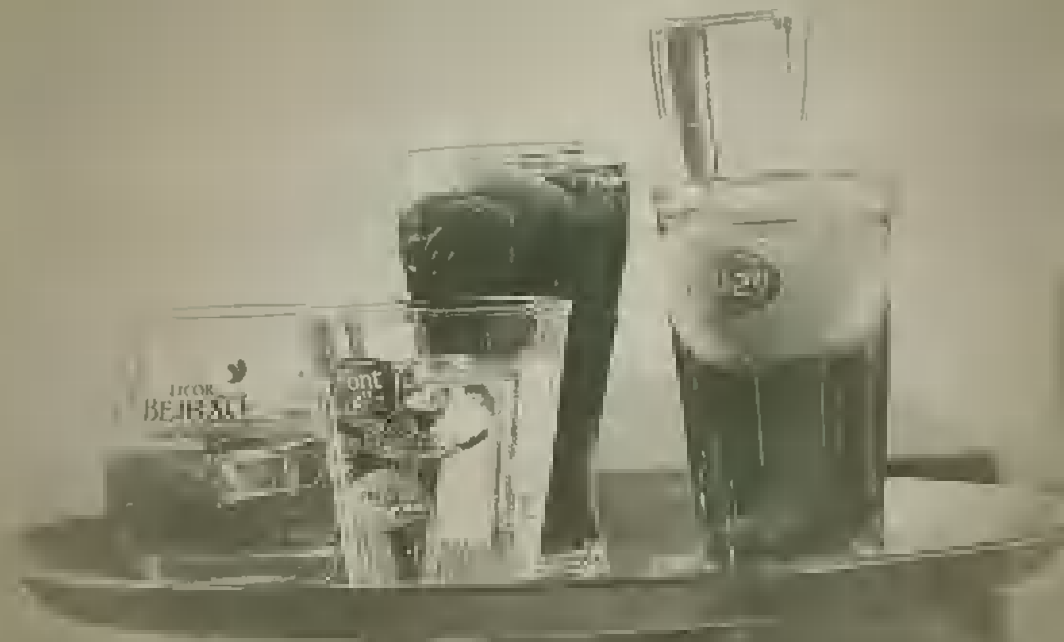

Individual box
(with or without window)

PACKAGING MATERIALS

A well-developed packaging must be designed to address the needs of its life cycle, which runs from the moment a product is packed, to the display at the point of sale, its usage, and finally its after-use.

Ideally, a package should consist of materials that guarantee the quality and safety of the product indefinitely, with no degradation over time. It should be attractive, practical, and effortless, while conveying all relevant information for the end-user. Optimally it should be made from renewable resources, generating no waste for disposal, as well as cost effective.

Creating good packaging is an art as much as a science, trying to achieve the best overall result without falling below acceptable standards in any single category.

our collection

LC Glass offers a large collection of elegant and trendy glassware for different purposes and every occasion. Our extensive portfolio blends traditional and classic shapes with fancy and unique designs, in a perfect combination of functionality and style.

From drinkware and barware to homeware and serveware, our versatile assortment includes a broad range of items that can be customized according to the customer's needs and market demands.

FLOWERS & CANDLES

“My philosophy is that everything starts with a great product.”

Steve Jobs
Entrepreneur and business magnate

CRAFT BEERS

Craft beers are high quality beers with intense flavours that require glasses with certain specificities for a full tasting experience. Tumblers often contain a lower chamber that helps to preserve the singularities of each beer, delaying the release of its flavours and aromas, known as the "chimney effect". These strange looking designs are perfect for the complex acidity and tartness of sour and wild beers.

Stemmed glasses feature a wide angled bowl, being most suitable for the indulgent sweetness of dessert stouts or the tropical juicy flavours of Hazy IPAs.

Both designs show an angled profile that influences the beer's carbonation and holds the head foam, while its pronounced lip on the rim makes it easier to savour craft beers.

BELGIAN BEERS

These short stemmed beer glasses are perfect to serve strong Belgian ales and stouts, Flemish red or sour brown ales. Its rounded bowl emphasizes the beer flavours while the tapering top captures the aromas, enhancing the tasting experience.

BEER STEMWARE

These robust yet elegant glasses elevate beer presentations in Fine Dining settings. Traditional beer stemware are suitable for a multitude of styles, from ales and lagers to lambics and saison beers, while the tulip shaped designs are ideal for specialty fruity varieties.

WHEAT BEERS

These typically tall beer glasses provide an exceptionally pleasing presentation for wheat ales and pale lagers. Designed for draught beer service, these large capacity glasses, feature a rounded top that holds a generous head of foam.

PILSNER BEERS

Perfect for serving classic pilsners and other pale lagers, these sleek tall glasses are perfect for showcasing the colour, clarity and carbonation of beer. The slightly conical design of these glasses directs the beer to the palate and allows the aromas to easily reach the nose for a better tasting.

PUB BEERS

Traditional English style Pub glasses are light and thin conical-shaped tumblers, suitable for a variety of classic ale beers such as IPAs, Pale and Brown Ales, or Stouts. A must-have in most breweries, bars and pubs, these straight sided glasses with a wide mouth, also known as Pint glasses, are regularly nucleated on the base to keep an active bubbling, that helps preserving the head foam.

BEER MUGS/ STEINS

Traditionally very popular in Central Europe, especially in Germany, large beer mugs are commonly associated to the famous Oktoberfest. From the most traditional shapes to modern designs, these sturdy tankards are ideal to serve Munich beers and other dark German lagers.

standard
shapes for

beers & ciders

Beer is one of the oldest alcoholic drinks and is the third most popular drink worldwide, after water and tea. Its origins date back to more than 5,000 years ago, when brewing emerged in the grasslands of southern Babylonia (modern Iraq). It is produced by the brewing of cereal grains, most commonly from malted barley, fermented with hops and yeast and mixed with hot water.

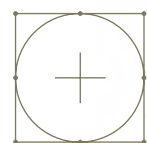

Cider is an ancient alcoholic beverage made from fermented apple juice, first produced in Britain by the Celts, around the year 55 BC.

This drink is extremely popular in the United Kingdom and the northern regions of France, Italy, Spain and Portugal.

Branding

Branded glassware play an important role in the beer industry. Beer producers bet on customized glasses, wearing the brand's logo, as marketing tools to promote the brand and connect with its consumers. Our portfolio includes a huge variety of shapes that can be customized with the image of the brand, through a multitude of decoration techniques available to choose from.

"What we always look for in a beer glass is the "chimney effect", perfectly achieved through the amazing design of the Arôme Craft. Its shape contains a lower chamber that helps preserving the singularities of each beer, delaying the release of flavours and aromas, to provide a full tasting experience. Its angled profile influences the carbonation of the beer, while holds the foam in place, and its pronounced lip on the rim makes it easier to savour craft beers."

Pedro Baptista
Co-founder & CEO at Praxis - Cervejas de Coimbra (Portugal)

Craft beer is shaking up the market! Betting on premiumization, craft brewers are constantly launching innovative varieties, new styles, and original flavours. This boom is pushed by an increasing demand for high-quality beverages with a sustainable footprint.

Brands are creating an exclusive universe of customized items worshiped by beer lovers, especially the younger generations, who are eager to be part of this trendy and cool subcultural movement.

The BAR range is ideal for draught beer. These pub glasses can be lined at 0,5L, 0,4L, 0,3L and 0,2L for beer served straight the tap.

AnDer is the best glass for brewers and beer lovers! A co-creation with Dutch experts to develop the ideal glass to smell, taste, evaluate and drink beer. Carefully designed under the precious guidelines from the beer sommelier, Andre Koppen, and the beer consultant, Derek Walsh, this beer taster matches the most exigent requirements of beer professionals. AnDer's beautiful design goes hand-in-hand with its functionality. The wide tulip-shaped bowl, with a narrow top, makes it ideal to optimally judge the flavour, aroma, colour, clarity and foam concentration of different beer styles.

Beer mugs are traditionally very popular in Central Europe, especially in Germany where they are commonly associated to the famous Munich's event, Oktoberfest. From the most traditional shapes to modern designs, these large tankards come in all styles and sizes to match the needs of different markets. The handle avoids that the hand is in contact with the vessel, keeping the drink cooler for a longer period.

BALLOONS

Brandy glasses are traditionally balloon-shaped, featuring a rounded bowl with a narrow rim on a short stem. However, tulip-shaped bowls are more appropriate to savour a cognac due to its convex design, which directs the aromas to the nose, and the flavours to the back of the palate, capturing the essence of these spirits.

SNIFTERS / TASTERS

Spirits must be tasted in tulip-shaped glasses for a full appreciation of these elixirs in all its splendour. The slightly closed shape of the glass locks in the aromas, which are then gradually revealed during tasting by directing the drink to the palate.

FORTIFIED WINES

These sugary liqueur wines must be served slightly chilled in a stemmed glass, avoiding the contact of the bowl with the hand to prevent from warming up. The narrow rim of the glass brings out the complexity of its flavours and aromas. Fortified wines like Port, Madeira, Sherry, Marsala or Muscatel perfectly pair up with desserts, sweets, fruits or even cheeses. These sweet-natured wines long neglected by wine lovers, are now attracting a new generation of wine drinkers.

SPECIALTY LIQUEURS

Glasses with different shaped bowls to serve aperitif or digestif liqueurs. While Aquavit or Limoncello are served in a V-shaped short-stemmed glass, Grappa or Amaro are served in a stemware with a long and narrow tulip-shaped bowl.

CORDIALS / LIQUEURS

Cordial glasses are short-stemmed glasses with small capacities (often tulip shaped), generally used to serve cordials or liqueurs.

SHOTS / SHOOTERS

The difference between shots and shooters is slim, but significant. Shots have been around since the Renaissance period, and consist on a single shot of spirits or liqueurs, while a shooter is a miniature mixed drink (the B-52 or the Kamikaze). You often find shooters in tall and thin glasses, while shots of liquor are served in short and heavier vessels.

ROCKS / DOF

The Double Old-Fashioned (DOF) is the big brother of the Rocks, and therefore also known as a Double Rocks. With its wide rim and often heavy thick base, is ideal for full-bodied alcoholic drinks and cocktails. The rocks, also known as old-fashioned (upon the famous cocktail with the same name), is the classic choice for serving spirits neat or on the rocks.

standard
shapes for

spirits & liqueurs

Spirits are alcoholic beverages purified through a distillation process, obtained from fermented cereals, grains, plants or berries (vodka, rum, whisky, tequila, gin, cognac).

Liqueurs are beverages bottled with added sugars, containing flavours usually derived from fruits, herbs or nuts (coffee liqueur, limoncello, maraschino, anis, amaretto, cream liqueur).

spirits
& liqueurs

Spirits and liqueurs can be savoured in many ways: straight, on-the-rocks, mixed or simply for a tasting. For each different serve there's an appropriate glass shape. For a perfect tasting, ideally the glass should have a convex design with a narrow rim to enhance the complexity of flavours and aromas of the drink. To enjoy a spirit on-the-rocks, however, it should be served in a short, wide tumbler that can easily accommodate ice cubes, such as a rocks or double old fashioned glass. If the preference, however, is to enjoy it straight in one sip, shot glasses are the best option.

Carefully designed to regulate the alcohol released from the drink, Arôme glasses are ideal to taste and savour XO spirits. Its convex area near the rim allows the aromatic complexity of the drink to stand out.

SPARKLING WINES

For more than 300 years, the Coupe was the preferred champagne glass, until it started to be replaced by the tall elegant lines of the Flute, in the early 20th century. With its tapered neck, which contains bubbles more efficiently, Flutes became the undisputed shape for champagne and other sparkling drinks. Nowadays, with the nostalgia for vintage designs, the coupe is making its way to modernity with some amazing shapes.

LIGHT & SMOOTH RED WINES

Red wines containing fewer tannins, require a large bowl with a wide mouth, allowing the wine to breathe and carefully release its subtle flavours and delicate aromas.

ROUND & MATURE RED WINES

Full bodied red wines with a higher concentration of tannins, result in a bigger complexity of flavours and aromas. These wines ask for a long bowl with a narrow mouth, directing the wine to the back of the palate for a full tasting experience.

RICH & HEAVY WHITE WINES

Full bodied white wines require glasses with wider bowls and a tulip shaped opening, to enhance the complexity of aromas, directing the wine to the back of the tongue to enjoy the intensity of flavours.

LIGHT & FRESH WHITE WINES

Glasses with smaller bowls are perfect for lighter wines with less amount of alcohol. A narrower rim concentrates the delicate and subtle aromas, directing the wine to the tip of the tongue for an easier flavour delight.

DESSERT WINES

These underrated fortified wines are paving its way into fine dining. Ideal to savour at the end of a meal, these typically sweet wines must be served slightly chilled, in a short-stemmed glass with a narrow rim, to bring out the complexity of its flavours and aromas.

CASUAL WINES

These functional and versatile low-stemmed glasses, with its smaller sized bowls, are ideal for casual wine drinking moments. Informal wine drinkers are seduced by the aesthetics of tavern-bistro style goblets, in opposition to purpose driven glass designs.

CLEAN WINES

Clean wines are ideal to savour in light-weighted stemless glasses with a simple design, perfectly matching the pureness of the drink. A new and original way to serve and drink wine!

standard
shapes for

wines & sparkling

Wine is considered the oldest alcoholic drink in the world, with roots dating back to 6.000 BC, in the Caucasus region. Large scale production started 2.000 years later in Armenia. Out of all alcoholic drinks, none has had such an historical impact on mankind. The trade of wine between cultures opened up channels for religious and philosophical ideas to spread across Europe, setting the foundations of western society.

This popular beverage is made from fermented grape juice and can be classified in 5 varieties: red, white, rosé, sparkling and fortified.

Plissé is an elegant range of wineglasses with a distinct feature. The vertical lines inside the bowl upscale this design into a fine dining ambiance. The light's reflection in its optics against the drink, creates a kaleidoscope of colours, elevating the drinking experience to a whole new level. Blown glasses can be customized with optical patterns, transforming traditional wineglasses into unique pieces with an original look and feel.

"Every wine is unique, and the right wineglass helps to bring out the wines notes and flavours. When developing The Experts' Collection, we envisioned five pieces of stemware that would not only look amazing but also enhance the taste sensation."

Barbara Verbeek,
Sommelier Royal Leerdam

In opposition to the modern trends of wine drinking in large and tall stemware, in some regions of France and Italy, there's a deeply rooted tradition of wine serving in short-stemmed goblets. These bistro-tavern style glasses, usually contain smaller capacities for a casual wine drinking experience. Our assortment includes a variety of timeless designs, matching the specificities of these markets.

The current consumer trend around wellness and healthier lifestyles has been extended to the alcoholic drinks' universe. Nowadays, people are drinking more consciously and searching for healthier options to the traditional booze. Alongside the no-low movement, there's a preference for drinks made only from organic ingredients, crafted under artisanal producing methods. Within this panorama, a new genre of wines has been growing in popularity. Clean wines are made only from natural grapes, with no additives or preservatives, harvested from organic or sustainable vineyards and farmed without pesticides or chemicals. Clean wines are ideal to savour in light-weighted stemless glasses with a simple design, perfectly matching the pureness of the drink. A new and original way to serve and drink wine!

The coupe is, undoubtedly, the most festive and sensual champagne glass. However, some experts consider that this historical shape is not ideal to serve the drink. It is said that its wide opening enhances flavour, but not the aromas, as the bouquet is lost over the surface of the glass. Therefore, this shape has been slowly replaced by the slender elegance of the flute, as its long narrow bowl encourages the flow of the bubbles and directs the aromas to the nose. Nowadays, with the current vintage trend there's a reminiscent nostalgia for the roaring twenties, the coupe is making its way to modernity with some amazing designs. As there are pros and cons to each style, our assortment includes a vast range of designs to choose from.

Dessert wines have always been neglected by wine lovers, that granted a bad reputation to this genre. But these underrated fortified wines are paving its way into fine dining. Ideal to savour at the end of a meal, these typically sweet wines perfectly pair up with desserts, sweets, fruits or even cheeses. Dessert wines must be served slightly chilled, in a short-stemmed glass with a narrow rim, to bring out the complexity of its flavours and aromas.

LARGE BALLOON (COPA)

Gin & Tonic is typically a Highball cocktail, but Copa glasses have been recently paving its way into HB territory. Large balloon stemware can hold more ice for a quicker cooling and its wide bowl allows the aromas to shine, emphasizing the gin's botanicals. The stem keeps the hand away from the bowl, preventing ice to melt and dilute the gin.

MARGARITA

So many classic cocktails are known by the glass they are served in, that we wonder which came first, the glass or the drink. The origins of the Margarita glass are fuzzy and mysterious, but the quirky silhouette of this curvaceous coupe, resembling an inverted Mexican sombrero, is ideal to serve this popular cocktail, as its wide rim cries out for a coating of salt.

MARTINI

If one glass shape captures the glamour of the cocktail age, it's the V-shaped Martini glass with its geometric lines and delicate stem. This is the best example of a glass that is known for the cocktail it holds.

COUPE

The Coupe is ideal for serving drinks that should be served chilled, but not on the rocks, and has largely dethroned the Martini glass as the queen of cocktail glasses. Serving cocktails in Coupes heightens any sweetness, reduces the alcohol sensation and helps blend the individual tastes into a satisfying whole.

NICK & NORA

This glass shape is inspired in a design used by Nick and Nora Jones, the main characters from the 1930s popular film series, "The Thin Man". These distinct look glasses are now back to the modern bar scene. Its silhouette, somewhere between a martini and a coupe, avoids spillage when drinking, making them perfect for classic and simple cocktails.

ROCKS / DOF

The Double Old-Fashioned (DOF) is the big brother of the Rocks, and therefore also known as a Double Rocks. With its wide rim and often heavy thick base, is ideal for full-bodied alcoholic drinks and cocktails. The rocks, also known as old-fashioned (upon the famous cocktail with the same name), is the classic choice for serving spirits neat or on the rocks.

HIGHBALL / COLLINS

The Collins takes its name from the Tom Collins cocktail, for which it was designed. This cylindrical glass is similar to the popular Highball, but the two shouldn't be confused. The thinner and taller Collins is ideal for carbonated drinks, while the shorter and wider Highball it is used to create iced drinks and cocktails.

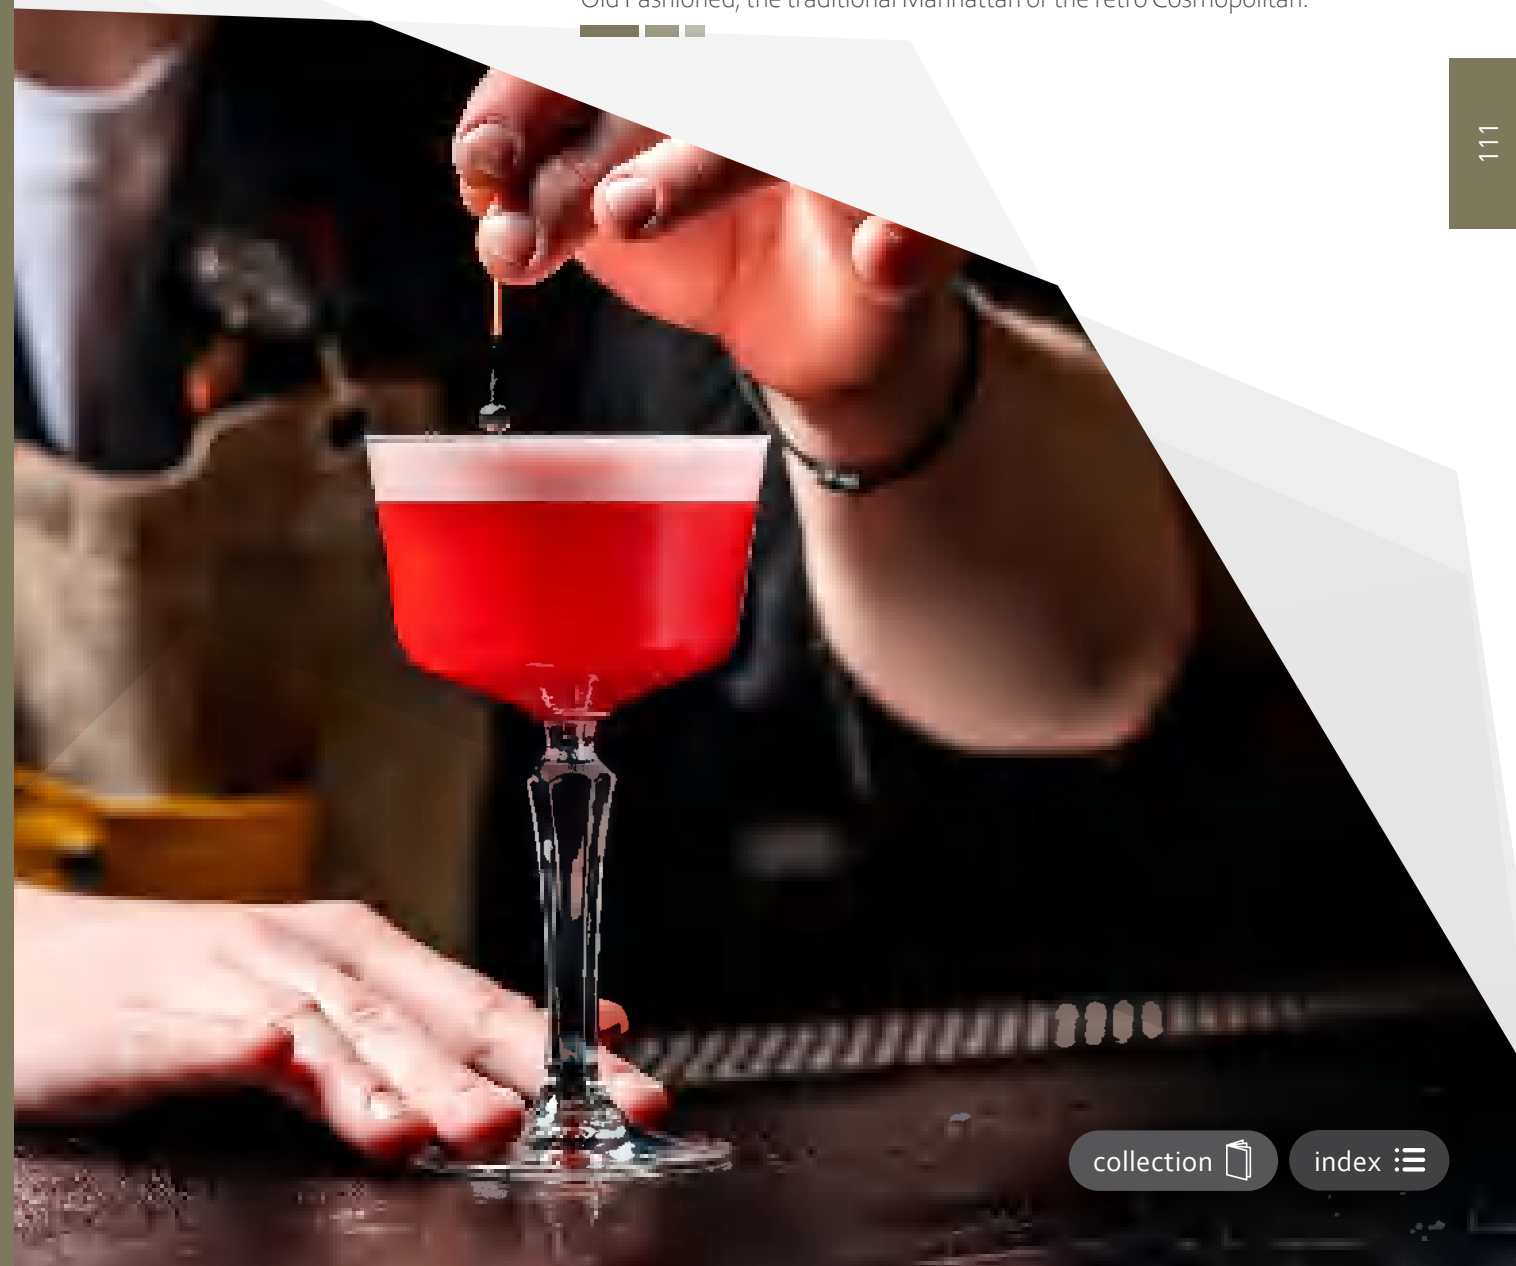

SPECIALTY COCKTAILS

Specialty cocktail glasses are unique designs with a twist of fun, ideal to serve colourful and kitsch 80s' style cocktails and mocktails, with its flamboyant garnishes. Hawaiian style shapes like the Hurricane, Napoli Grande or Bamboo have helped to popularize cocktails such as the Blue Lagoon, Tequila Sunset, or Dark & Stormy.

standard
shapes for

cocktails & barware

Cocktails are alcoholic beverages containing spirits and mixed with ingredients like tonic water, juices, syrups, bitters, spices or cream. Inspired by British punches, cocktails have been around since the beginning of the 19th century but it's only during Prohibition, in the United States, that they become extremely popular. The 1920s are known as the Golden Age of cocktails! However, since the late 1960s cocktails have experienced a continuous decline in popularity, until approximately ten years ago, when the cocktail culture has exploded across Europe and America, through a new style of mixology which combines traditional cocktails with novel ingredients. The resurgence of cocktails has also been boosted by popular TV series like "Mad Men" or "Sex in the City" that have brought back the classic Old Fashioned, the traditional Manhattan or the retro Cosmopolitan.

Gin & Tonic is a classic highball drink, therefore this tall sleek glass shape tends to be the natural bartender's choice. But in recent years there has been a rise in popularity of the G&T served in a large balloon glass, or "copa". This trend started around ten years ago in Spain and was soon spread throughout the European bar scene.

The vintage trend is here to stay! Nowadays, in a parallelism to 100 years ago, the world is revisiting the roaring twenties with all its inherent indulgences. Some of our iconic designs reflect the heritage of the so called “Brilliant Period of American Cut Glass” with a modern twist on the classic vintage chic style (Hobstar, Radiant, Carats). Others pay tribute to the Prohibition Era with its speakeasy bars (SPKSY & 1924) or the Post-war Hollywood noir movies (Cheers & Flashback). Our latest novelties are inspired by the glamorous and exuberant architecture of the Art Deco movement (Modern America & The Gats).

SKINNY CAN

During the pandemic, a new trend named "Hometainment" emerged pushed by the growing at-home consumption, leading to a boom of the Ready to Drink segment, mainly due to its convenient format.

As consumers reach out for beverages lower in alcohol, calories, sugar, and carbs, hard seltzers, pre-mixed cocktails, and FABs (flavoured alcoholic beverages) answer to all those needs. Bartenders are also using hard seltzers as an alternative to tonic water for a touch of sophistication to cocktails, due to their flavour variety.

COOLER

As the name suggests, these large capacity tumblers are mainly used to serve soft drinks with lots of ice, such as the traditional Iced-Tea, or long-drink cocktails served with crushed ice. They are also very popular for Ice-Coffee drinks and smoothies or milk-shakes.

HIGHBALL

This popular tall cylindrical glass is frequently used for carbonated soft drinks or to create cocktails, served with lots of ice. Named after the popular Highball cocktail, originated in the 1800s, this tumbler is a classic in bars all over the world. The original Highball cocktail is made with Whisky and Soda water, but today is more commonly mixed with Ginger Ale and ice.

BEVERAGE

Beverage glasses are multi-purpose tumblers from different shapes and sizes, with no particular functionality, that can be used to serve any kind of drink, from water to milk, juices and soft drinks, cocktails or even beer.

DOF

The Double Old-Fashioned (DOF) is the big brother of the Rocks, and therefore also known as a Double Rocks. With its wide rim and often heavy thick base, is ideal for full-bodied alcoholic drinks and cocktails. From thin and light-weighted glasses to sturdy and heavy base tumblers the options are endless.

SPIRITS

These rounded designs are perfect to savour spirits served “neat” (unmixed spirit drinks to be tasted at room temperature). Its convex shape is ideal to enhance the complexity of flavours, while swirling the drink for an optimal observation of its tears, and the tapered rim of the glass allows the olfactory characteristics of the most delicate spirits to stand out.

ROCKS

The rocks, also known as old-fashioned (upon the famous cocktail with the same name), is the classic choice for serving spirits neat or on the rocks. These short glasses with reduced capacities, come in an array of shapes, from simple and clean designs to classic and vintage patterns.

Over the past years hydration has become a huge trend, especially amongst younger generations who are more alert to the health and wellness movement. Social media play an important role in the increasing water consumption, driven by the posts of influencers and celebrities about the benefit of stay hydrated. Nowadays, dehydration is a global issue that can lead into a series of health problems, so water should be part of our daily routines, as it's essential to keep the body functioning well. Therefore, all over Europe, governments are launching campaigns to appeal for water consumption. In some countries there's even an emerging trend to drink water from the tap. For consumers that don't really appreciate plain water, infused waters seem to be the perfect alternative. These refreshing drinks, flavoured with fruits, vegetables or herbs look amazing inside our elegant carafes with matching glasses.

Customization

Our production capabilities include a multitude of customization possibilities to create original pieces. By adding a single stripe of feeder colour into blown glassware, we can transform a simple shape into a unique design, upgrading any table setting presentation. The coloured stripe* has a random distribution on the glass, giving it an organic appearance and making each item unique. Glassware with colour effects is a huge trend in restaurants and bars, but also at home.

* limited colours available: black, grey, amber and different shades of green and blue.

PLISSÉ

Customization

Glassware with optical effects is a huge trend in restaurants, bars, or at home. The vertical optics of our glasses reflect the light into prismatic colours, creating original table settings and elegant presentations.*

Customization

In blown items it's possible to apply additional features to create original items. A small air bubble* is inserted in the base of items with thick sham to give a touch of elegance and charm to everyday glassware.

* the bubble is randomly positioned and its shape and size is different in every glass.

The Aether range interprets the unique textures created by Nature's eternal evolution as manifested in the simple beauty found in the raw materials of rock, wood and water, and the natural phenomenon of cracked dry soil in a thirsty landscape. The bold, distinctive design of the Aether range builds on a simple plunger pattern to create a sense of tranquility and pure, unadorned nature that so many seek as an escape from today's high-speed world.

Because you
can't compromise
on strength.

Onis' Xtratuff treatment is a super strengthening thermal after-process for "pressed" tumblers.

The Xtratuff process is only performed on the upper third of the glass, which increases its resistance to thermal and mechanical shock.

By treating this upper portion at a lower temperature than tempering, you put less stress on the glass. This has a positive effect on how the glass breaks and also improves its overall durability.

The glassware ranges with Xtratuff include: Gibraltar, Paneled, Winchester, Inverness, Brooklyn, LinQ, Everest, TarQ and Endeavor.

* After process additions, like decorating the glasses may affect the Xtratuff treatment, impacting the properties or losing completely its specifications. LC Glass accepts no liability for this.

STACKABLE GLASSWARE

Stacking is bad for glassware. Glass-on-glass contact is likely to cause damage and increases the probability of breakage, due to mechanical or thermal shock. However, is often inevitable for a better usage of space for storage, for washing/drying, organizing stocks or even transportation.

Whilst stacking is still not ideal, Onis has developed ranges of glassware, designed to reduce the problems involved with stacking, minimizing its negative effects.

Clever designs to ensure straight stacking with reinforced contact areas and toughened edges.

For stackable glasses, which need to be able to deal with the rigors of daily life in all sorts of demanding settings, you simply can't afford to compromise on strength. So, it's good to know that, thanks to their Xtratuff treatment, our glasses will be up to the job.

LIQUOR COFFEE

Liquor coffee is a caffeinated alcoholic drink that consists of a shot of liqueur, mixed with coffee and sweetened with sugar. Typically served in a stemmed glass mug, it is topped with whipped cream for a dramatic appearance. The most popular liquor coffee beverages are the Irish Coffee, The French Connection or the South African Kula.

AMERICANO STYLE

Traditionally served in large mugs, Caffè Americano, also known as Black Coffee, consists of drip-filtered coffee or by pouring hot water over an espresso shot. In the Land Down Under, however, it is served the other way around, an espresso shot is poured over hot water, and it is named an Australian Long Black instead.

CAPPUCCINO

Cappuccino is an Italian classic made with equal parts of espresso, steamed milk and foam, served in small cups, between 18 and 22cl. The size of the cup is important to get the right flavour balance, between the espresso and milk. These cups can accommodate other warm beverages, such as Lungo coffee, Breve, Mocha or even Affogato (espresso with ice cream).

ESPRESSO & CO.

With its typical creaminess and intense flavour, Italian espresso has become the preferred coffee drink worldwide. Served in small capacity cups or tumblers, not more than 12cl, this popular warm beverage is enjoyed in lots of variants, from the very short Ristretto to the double shot Doppio, or in original serves, like Cortado (with warm milk), Romano (with lemon), Vienna (with whipped cream), Café Bombón (with condensed milk) or Espression (with chocolate hazelnut cream).

LATTE VARIATIONS

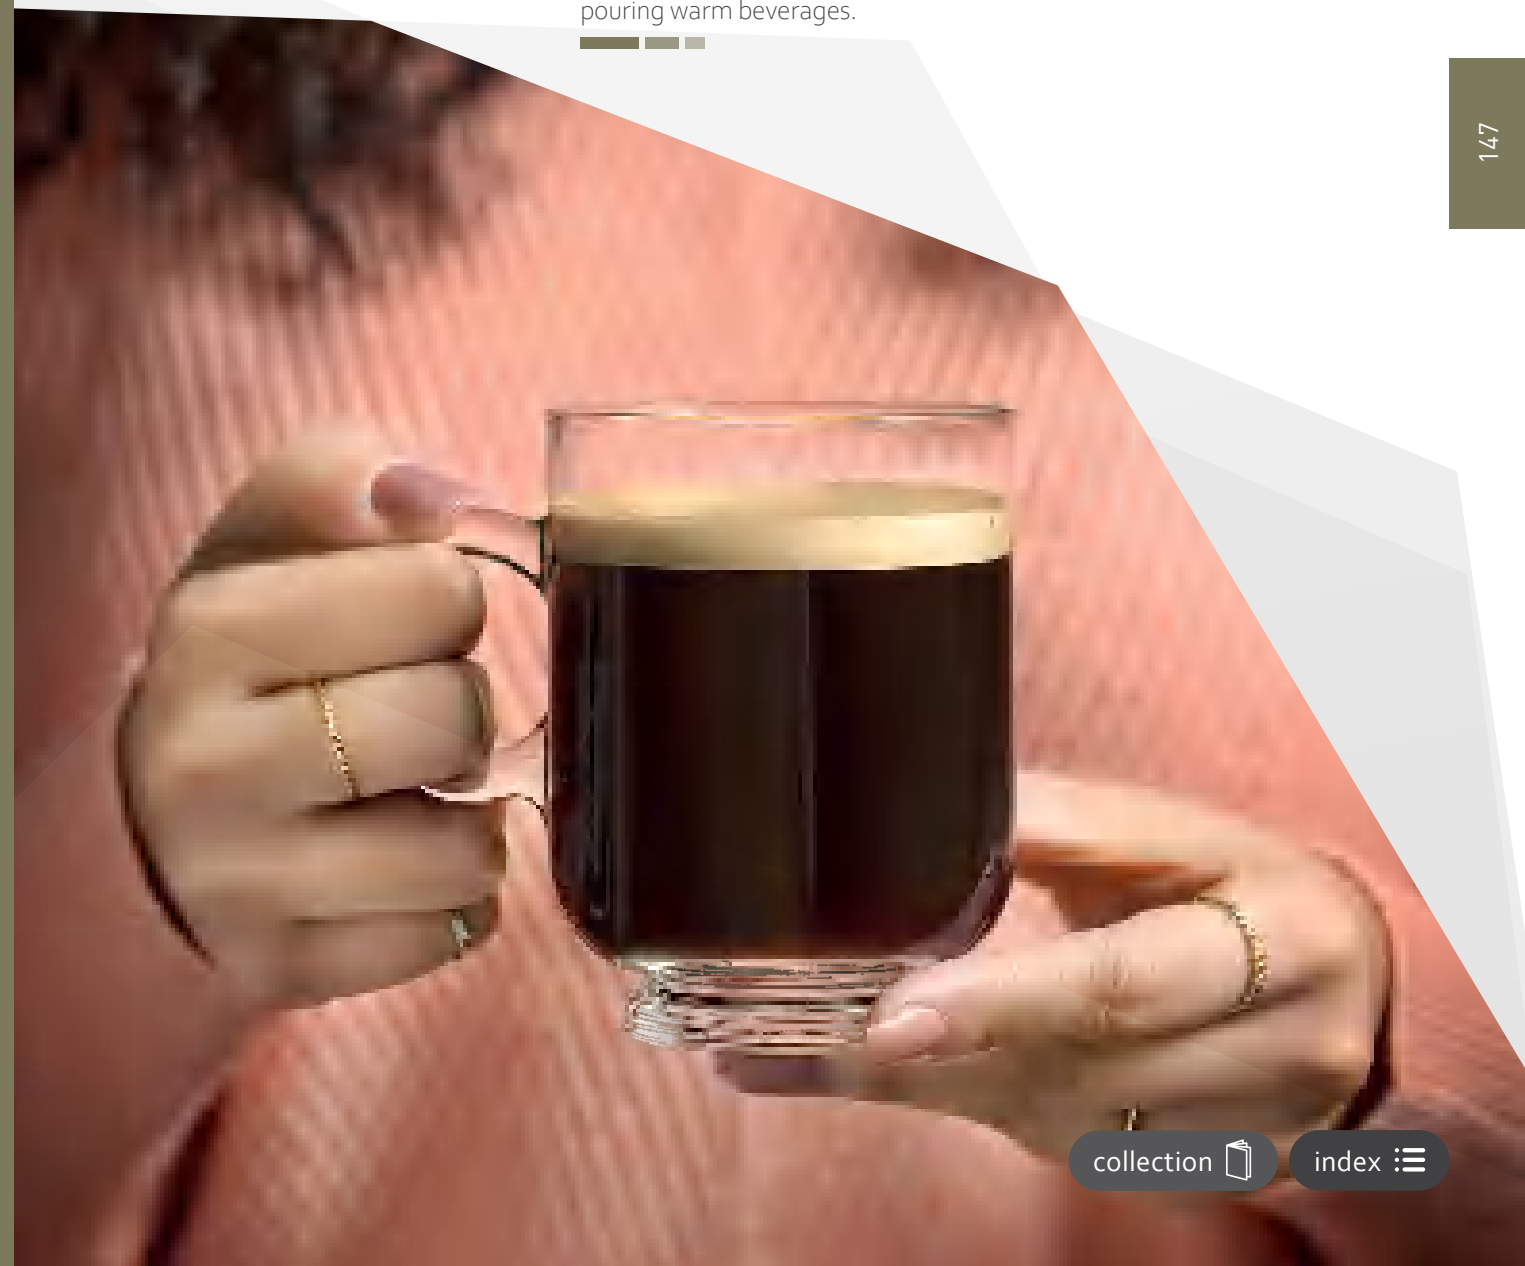

For those who love sweet coffee based drinks, one of the most popular choices is a flavoured Latte. Served in short glasses with a capacity around 20cl, these beverages consist in adding milk to coffee and are, usually, topped with foam or cream. Adding a splash of syrup, infusions, spices or rich flavoured ingredients, such as vanilla or caramel, latte comes in lots of variants. Traditional Latte, Flat White and Café au Lait are prepared with steamed milk, while Latte Macchiato and Galão use foamed milk. Tea based Asian versions of Lattes (Matcha and Chai) are the latest trend in warm beverages.

standard
shapes for

warm beverages

Traditionally, porcelain has been the preferred choice when serving warm beverages, but glassware is being adopted more often in specialized venues, especially for new varieties and methods of preparation. New types of coffee, tea or chocolate-based drinks (latte macchiato, mochaccino, frappuccino, bubble tea or cold brew coffee and tea), open new opportunities for glassware to shine. Baristas tend to prefer the transparency of glass to enhance their presentations, as some of these drinks are so beautifully that it is almost a sin not to serve them in a lovely glass.

Safety tip: always pre-heat glasses with hot water when pouring warm beverages.

GLASS
HANDLING TIP

Pre-heat glasses that will
hold warm beverages.

Coffee is not just coffee anymore. It is a discovery of new flavours and mixes, matching the trendiest lifestyles. Drinking coffee became a social act, thus coffee brands deliver innovative products and serving styles, leading to revised rituals and taste preferences. Seductive and stylish, yet technical, the science of coffee is injecting a new dimension on how it is served in cafés, at home or even at the office.

CARAFES & DECANTERS

These multi-purpose serving vessels are ideal for a variety of drinks, from infused waters, to sangria, juices or even white and rosé wines. Trendy yet practical, with its long silhouette, these large capacity pieces can turn any table setting from casual to elegant and stylish.

STORAGE JARS

Glass storage jars are a great alternative to plastic kitchenware. Available in multiple sizes, these food containers are ideal to store dried groceries, such as sugar, flour, rice or pasta. Practical and versatile, these sleek recipients are perfect to solve space organization issues, while making any pantry look beautiful and graceful.

STIRRING GLASSES

Next to the shaker, mixing or stirring glasses are must-haves on bar. This glass container is commonly used to mix cocktails in, by stirring ice cubes with a bar spoon to chill the drink. These large capacity recipients contain a pouring lip from where the drink is served into the glass with the help of a strainer.

ICE CREAM CUPS

Ice cream cups are usually footed glasses with fun and quirky shapes for flamboyant presentations. Perfect to hold ice creams with beautiful garnishes or serve delicious sundaes, with its colourful and sweet toppings.

SALAD/DESSERT BOWLS

Salad bowls, as the name suggests, are large recipients to prepare green or fruit salads, and sharable desserts like trifles, mousses or puddings. Dessert bowls are small sized glasses, suitable to serve small portions of fruit, ice cream, desserts, nuts and other snacks.

standard
shapes for

serveware & tabletop

With the constant lockdowns imposed by the pandemic, people had to be creative and come-up with new ways to spend time at home. Unable to go to bars and restaurants, some decided to improve their bartending and cooking skills by trying new recipes or mimicking their favourite cocktails. Our homeware assortment offers a variety of multipurpose and versatile items, perfect for everyday use.

flowers & candles

Forced to spend more time at home, we were bound to reconnect with our living spaces and relearn to enjoy our own houses. At a certain point we all had to be creative and come-up with original ways to customize our surrounding environment and set the perfect ambiance. A simple bouquet of fresh flowers and a few aromatic candles have the power to transform a boring space into an idyllic retreat. Our assortment offers a variety of home-décor glassware to embellish any house. From pots and vases for showcasing flowers or growing plants and herbs, to candle holders and items for scented candles. Most of these items are also interesting to the candle filling industry.

TEA-LIGHT CANDLE HOLDERS

Tea-light candles, with its soft mood lighting, can create a relaxing ambiance and bring warmth to a space. A scented tea-light in an elegant glass candle holder elevates the atmosphere of a room, inspiring moments of intimacy and romance.

VOTIVES & CANDLE CONTAINERS

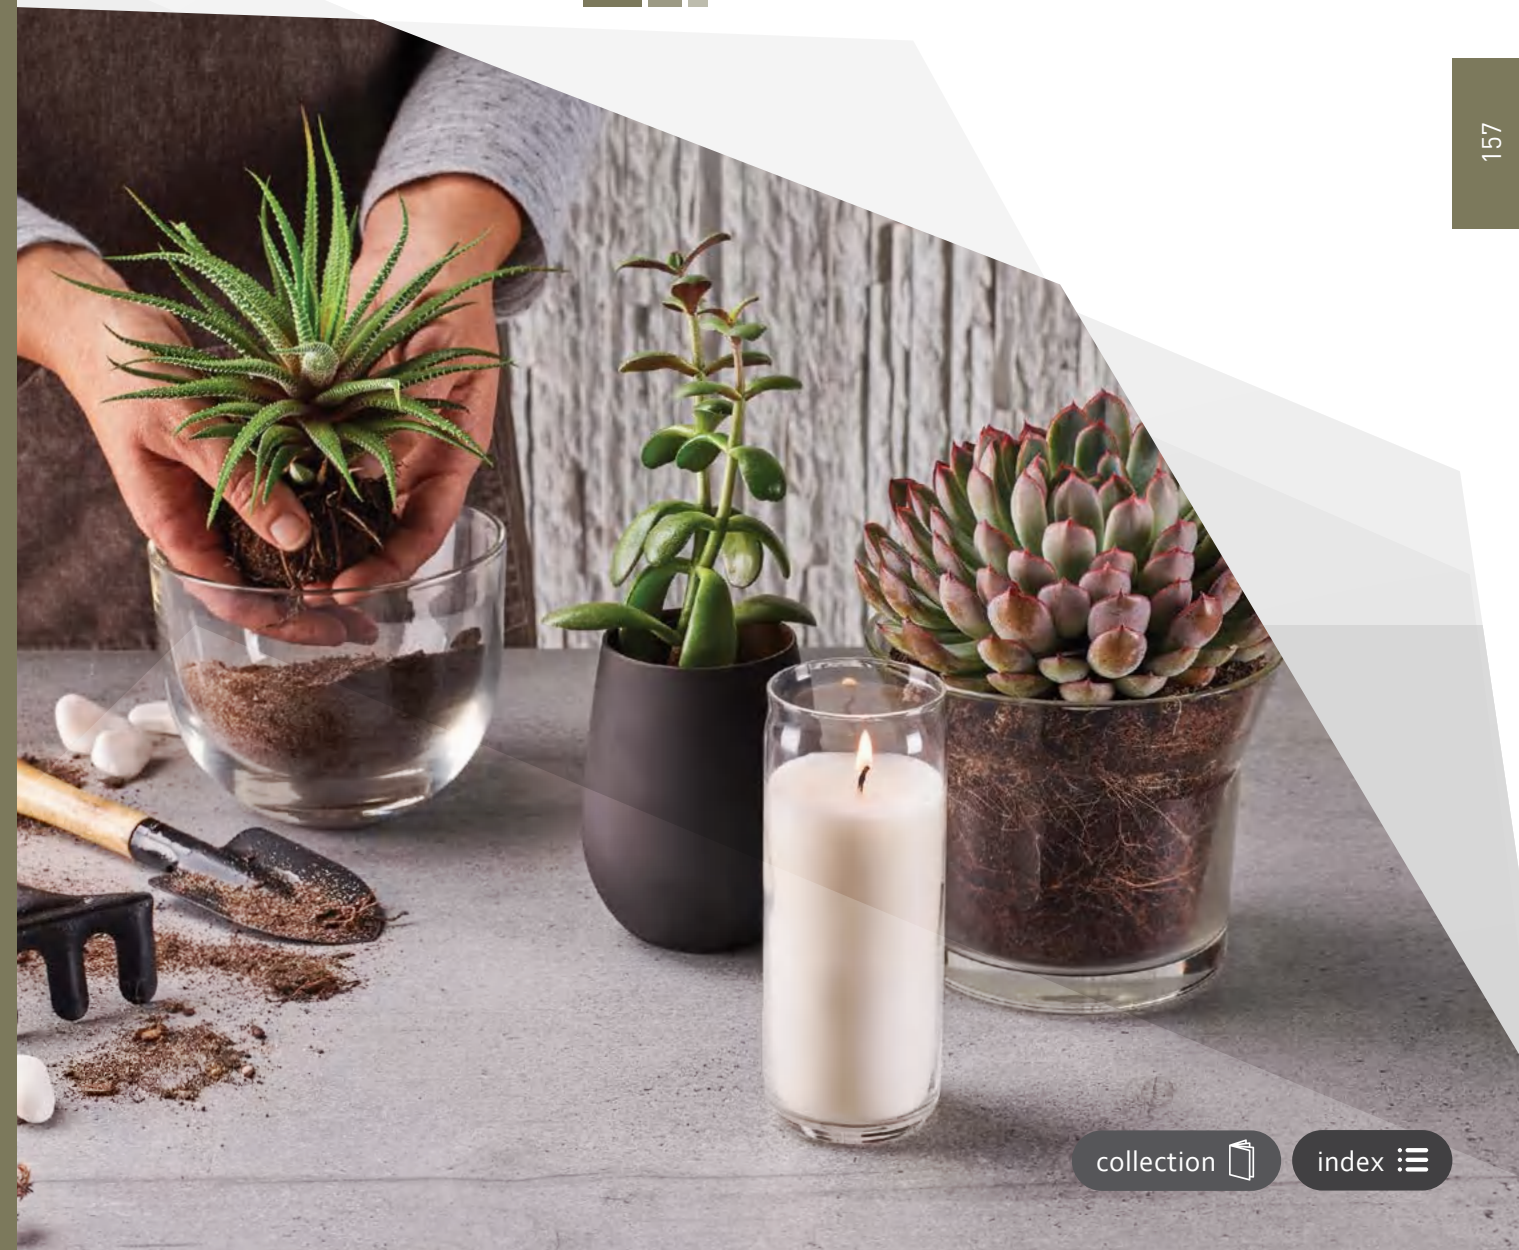

Votive candles are a great way to add a decorative touch and cosy ambiance to a home or table setting. These small, short candles often come separate from a container, meaning that is necessary a votive holder to burn these candles safely. These glass recipients come in a variety of shapes and sizes, and are also frequently used by candle-filling companies to create pre-poured votives, available in an array of colours and fragrances.

FLOWER JARS

The attractive scents and bright colours of fresh flowers have the power to brighten up the ambiance and make a room come alive. Glass jars with elegant Scandinavian designs are ideal to display blossom bouquets or simply some greenery, setting the mood for the perfect atmosphere.

POTS & VASES

Incorporating house plants into the home enhances the connection with nature and has a positive impact on mental well-being. From beautiful vases, to elegant pots for indoor plants, glassware is ideal to showcase foliage in style, thanks to its transparency.

Customization

Create YOR'OWN glass through our customization possibilities. This new shape contains an elliptical area, ideal for customizing. It can be branded with a logo for B2B or printed with a trendy pattern or a creative decoration for Retail.

The clear insert can be printed according to the customers' needs, but it's also possible to switch it by an embossed one, that can wear a brand's logo or a creative deco, like the That's Life series. For a reduced investment you can have your own glass, custom-made upon request.

Traditionally, the candle-filling industry uses tumblers filled with paraffin to create scented candles. But why not use low-stemmed glasses, instead? With its vintage design, our stemware ranges are excellent alternatives to tumblers, for a trendier and more premium look and feel.
